

PUBLIC NOTICE

WORKING ON MUNICIPAL PROPERTY

Friday, October 19, 2018

Recently, it has been observed that some residents have been completing landscape work at their residences. While the work looks nice, we need to understand that any alterations made to Municipal Property is to be approved by the Municipality BEFORE any work is to commence.

Adding features like rounded river stone within the Municipal Right-of-Way (ROW), while being visually pleasing, forces the Municipality to assume additional and unnecessary risk and liability.

If you are thinking about undertaking any work that might affect Municipal Property, please contact us and we will do our best to help achieve the best possible result.

Thank you,

A handwritten signature in blue ink, appearing to read 'A. Bird', is positioned above the printed name.

Andrew Bird, C.Tech., rcsi
Manager of Operations
