1.0 Introduction

The Municipality of Callander (Callander) is a small, thriving community situated on Callander Bay and the south shore of Lake Nipissing in Northeastern Ontario. Callander is located in the traditional territory of the Anishinaabe people and Williams Treaties (1923). Callander shares Lake Nipissing with many communities including the Municipality of West Nipissing, Nipissing First Nation, City of North Bay and Nipissing Township.

Callander has a rich physical geography. It's location on Lake Nipissing, in the Almaguin Highlands and on the Canadian Shield, all define the character of the community. This physical geography has supported the people that have lived here for thousands of years. It is also one of the main reasons why people continue to come to Callander to live, work, shop, visit and recreate.

Callander is known for its high quality natural environment, many recreational opportunities and downtown and waterfront area. It is also known as a desirable place to live, given its high quality of life, strong community connections and proximity to other centres including North Bay,

This Official Plan is about shaping the future of Callander. It builds upon the legacy of community development decisions and establishes policies that will guide future land use and infrastructure investment decisions. It will help to ensure that Callander is sustainable now and in the future.

1.1 Context

Callander is a single tier municipality and centre in the Parry Sound District of Northeast Ontario. Callander is approximately 103 square kilometres in area and is characterized by a range and mix of waterfront, urban and rural environments. Callander is accessible via water, rail and Highways 11 and 654.

Callander's climate is and will continue to change. It is anticipated that Callander's annual mean temperature and total precipitation will increase over the next 40 years. Callander is also expected to see more variable weather events.

Given it's physical geography, Callander has many natural heritage features and areas. This includes Lake Nipissing, the Wasi River and Falls, the Callander Bay Provincially Significant Wetland, the Jessup's Creek and Nipissing Junction Wetland Complexes and various significant wildlife habitat areas. Callander Bay also serves as a drinking water source for residents and is protected by the North Bay Mattawa Conservation Authority's Source Water Protection Plan.

According to the 2021 Census, Callander is home to just under 4,000 residents and 1,636 households. Between 2021 and 2046, it is anticipated that Callander's population will increase from 4,000 to 4,564, the population will continue to age, the number of persons per household will decline from 2.42 to 2.30, and the number of households will increase from 1,636 to 1,921.

In terms of housing mix, according to the 2021 Census, the majority of dwelling unit types in Callander are single detached homes. Similar to other communities, the mix of dwelling unit types will during the lifetime of this Official Plan as demand for row housing and apartment housing continues.

Callander's housing supply is relatively adequate that Ontario as a whole. Home ownership is the dominant form of tenure, while traditionally, housing was relatively affordable in Callander, in recent years the cost of home ownership has drastically increased, and is becoming less affordable within the community. Rental units and affordability is a challenge within the community. Traditionally, the dominant housing form was single detached dwellings, while this trend persist, there is also a trend towards denser form sof housing such as townhomes and apartments.

Callander has adequate land supply to accommodate the projected population and household growth in both the settlement and rural areas.

Historically, Callander's economy was closely linked to the forestry industry. As the importance of the forestry industry declined, the importance of tourism and the service-based industry has increased. Callander has a strategy to leverage its assets to foster additional growth through tourism, the downtown and waterfront as well as sustainable local economy and living practices. Callander's relative location to North Bay and supply of industrial and commercial lands further strengthen its relative strategic economic development advantage in the region.

Callander has a good parks and open space system including Centennial Park and Beach, Memory Tree Park, Veteran's Park, the beach on the south end of Main Street. Callander also has two community centres including the Callander Community Centre and South Shore Community Centre. This parks and open space system plays an important role in the quality of life, population health and economic competitiveness of the community.

Callander's transportation system includes Highways 11 and 654, arterial roads, collector roads, local roads, sidewalks, on and off street recreational pathways, cycling paths, public parking facilities and boating. Callander's Strategic Plan and Active Transportation Plan call for improvements in the community's active transportation system.

Callander is supported by an interconnected system of hard and soft services including municipal water services, municipal sewer services, police and emergency services, amongst others. These services are important to the quality of life, economic competitiveness and health and safety of the community. Residents in the rural area of Callander rely on individual water and sewage services.

Callander's geological structure suggest that the community has high mineral potential. Callander has some mineral aggregate resources, which are classified by the Province of Ontario as having secondary or tertiary significance.

Callander has a rich cultural heritage. Callander has archaeological potential given its location along Lake Nipissing and the Wasi River. Callander has yet to identify any buildings or areas as having cultural heritage value or significance to the community.

Callander is fortunate to have a wealth of natural features within the community that allow for both formal and informal recreational activities. Callander also contains lands prone to hazards such as Lake Nippissing and the Wasi River which are susceptible to flooding.

Additional context for this Official Plan, including further information on the above and the provincial and local policy context can be found in *Background Report*. *Callander Official Plan* dated May 19th, 2022. This Official Plan is a living document. It is anticipated that the policies will be updated as the community and external environment changes.

1.2 Basis

This Official Plan includes and balances local and provincial goals and priorities for Callander.

This Official Plan is informed by Council's Strategic Plan and other local plans, initiatives and business practices including the North Bay Mattawa Conservation Authority's Source Water Protection Plan and the Downtown Waterfront Revitalization Master Design Strategy, amongst others.

This Official Plan is also informed by and complies with the *Planning Act*, conforms/does not conflict with the Growth Plan for Northern Ontario and is consistent with the Provincial Policy Statement, 2020. The Official Plan is also informed by other provincial legislation, regulations, and policies such as the *Aggregate Resources Act*, *Ontario Heritage Act* and *Environmental Protection Act*.

This Official Plan generally aligns with international and Federal initiatives such as the United Nation's Sustainable Development Goals, in particular Goal 11 Sustainable Cities and Communities.

This Official Plan reflects the perspectives of residents, business owners and stakeholders that participated in the plan development process to date.

1.3 Purpose

This Official Plan includes a long-term vision of what Callander will look like future and includes policies to guide land use planning, infrastructure investment and other decisions, consistent with this long-term vision.

This Official Plan establishes goals, objectives and policies to management and direct physical change and its effects on the social, economic and natural environment. It contains policies and measures to help ensure the adequate provision of affordable housing. It also describes the measures and procedures that will be used to obtain the views of the public during the land use planning approval process.

This Official Plan provides the basis for and will be implemented through other land use planning tools including the Zoning By-law. Further information on these tools, and how they help implement the Official Plan, is found in Section 12.

1.4 Vision

To be developed.

1.5 Structure

This Official Plan is divided into several sections each with their own focus, as follows:

Section 2. Growth and Settlement describes Callander's approach to growth management including policies relating to land supply, intensification, garden suites and additional residential units.

Section 3. Land Uses describes the land use designations including Residential Area, Downtown Area, Employment Area, Gateway Mixed Use Area, Open Space and Parkland and Environmental Protection Area, and permitted uses within these designations subject to certain conditions.

Section 4 Rural Area Land Use Designations describes the land use designations including Rural Area, Shoreline Area, Island Area, Mineral Mining Area, Mineral Aggregate Area, Open Space and Parkland, and Environmental Protection Area, and permitted uses within these designations subject to certain conditions.

Section 5. Housing describes Callander's approach to supporting attainable and affordable housing and includes housing targets, and policies relating to affordable housing, supportive housing, short-term rentals, design and mobile homes.

Section 6. Water Resources provides policy direction for water resources within Callander, including source water, Callander Bay and Surface Water Features.

Section 7. Natural Heritage Features and Areas describes the natural heritage features and areas within Callander, and how they should be managed.

Section 8 Cultural Heritage and Archaeology describes Callander's approach to managing cultural heritage resources, and archaeological resources.

Section 9. Protecting Public Health and Safety provides policy direction on managing hazards within Callander, including flood hazards, erosion, unstable soils and steep slopes, abandoned pits and quarries, contaminated lands, waste disposal assessment areas, wildland fire and unidentified hazards, and provides direction on land use compatibility.

Section 10. Mobility provides policy direction on the transportation network within Callander, this includes active transportation, roads, parking, water and lakeshore and road allowances.

Section 11. Infrastructure and Utilities provides policy direction for water and sewer servicing, development staging, stormwater management, waste management and utilities.

Section 12. Implementation provides direction on how this plan will be implemented during its lifetime.

Schedules A to E form part of this Official Plan.

For further information on how to use and interpret this Official Plan, please refer to Section 12.

2.0 Growth and Settlement

Callander is expected to grow in the future. How this growth is managed, matters. It will influence what the community looks like the future, where people live, work, shop and recreate and how the move around the community. It will also influence Callander's economic development, affordability, quality of life, population health and contributions to biodiversity, energy efficiency and climate change.

Traditionally, Callander has used a two-part growth management strategy which directed the majority of development to the fully-serviced settlement area and permitted limited growth within the rural area. This framework also encouraged 20 percent of growth in the settlement area to occur through intensification and redevelopment. Since the last Official Plan was adopted in 2011 there have been 27 new lots created within Callander, only 15% (4 lots) of which were created in the Settlement Area while 85% (23 lots) were created in the Rural Area.

This Plan builds upon this two part framework and continues to direct the majority of growth to the settlement area, as servicing capacity permits, and allows appropriate development in the rural area.

2.1 Objectives

It is the objective of Callander to:

- 1. provide an adequate land supply to meet short, mid and long term needs;
- 2. establish and maintain an urban settlement area boundary;
- 3. direct the majority of future growth to the urban settlement area;
- 4. permit appropriate development in the rural area:
- 5. encourage a mix of uses in the settlement area:
- 6. encourage intensification and redevelopment in the settlement area.

2.2 The Settlement Area

Callander's Settlement Area includes built up areas where development is concentrated and have a mix of land uses, as well as lands that are designated for development in the long term. The Settlement Area includes lands that are or can be serviced with municipal water and municipal sewage services, as shown on Schedule X insert title.

Callander's land supply consists of land at different stages of the land use planning cycle, including lands that are designated, lands that are zoned, lands in draft approved plans of subdivision or condominium and existing vacant legal lots of record. This supply is designed to accommodate an approximate range and mix of employment and housing and other land use needs in the short, medium and long term. There is adequate land supply in the settlement area to accommodate short, medium and long term needs, and a significant land supply in the rural area to accommodate short, medium and long term needs.

Policies:

1. The majority of future growth will be focused in the Settlement Area through intensification, redevelopment and, if necessary, development on designated lands.

- 2. The remaining future growth will be permitted in the Rural Area through construction on existing vacant legal lots of record and, if necessary, the creation of new lots.
- 3. Settlement Area land use patterns will be based on a mix of land uses and densities that make the most efficient use of land, resources, infrastructure and public service facilities, minimize negative impacts on air quality and promote energy efficiency, prepare for the impacts of a changing climate, support active transportation and are freight supportive. Settlement Area land use and densities will be defined in the Zoning By-law.
- 4. New development on lands designated in the Settlement Area should be phased to ensure an orderly progression of development and timely provision of infrastructure and public service facilities.
- 5. The Settlement Area is able to meet short, medium and long term land needs. Callander may consider expansions to the Settlement Area through a comprehensive review. Callander may permit adjustments to the Settlement Area provided there is no net increase in the Settlement Area, the adjustment would support Callander's ability to meet its intensification and redevelopment targets and the lands to be added to the Settlement Area are or can be serviced (including reserve capacity).

Programs:

- 1. Callander will monitor and report on development trends in the municipality on a periodic basis.
- 2. Callander may establish minimum density and height development standards for the Settlement Area in the Zoning By-law.

2.3 Intensification

Intensification, that is the development of a property, site or area at a higher density than currently exists through redevelopment, the development of vacant or underutilized lots, infill and the expansion or conversion of existing buildings will continue to occur in Callander.

Intensification is essential to completing our communities, making the most efficient use of land, resources, infrastructure and public service facilities, minimizing negative impacts on air quality and promotes energy efficiency, helps mitigate climate change, promoting energy efficiency and supporting active transportation and the efficient movement of goods.

Intensification must be compatible with the existing and planned character or an area and suitable to existing and planned infrastructure and public service facilities.

- 1. Callander will aim to accommodate up to 20 percent of future residential growth through intensification in the Settlement Area.
- 2. Intensification is encouraged in the Settlement Area in accordance with the policies of this Plan. In particular, intensification is encouraged on sites:
 - a. that are no longer viable for the purpose for which they were intended such as former commercial, industrial and institutional sites;
 - b. where the present use in maintained and the additional of residential uses can be achieved in a safe and complementary manner; and,
 - c. with suitable existing or planned infrastructure.

- 3. Intensification will be encouraged on sites with suitable existing or planned infrastructure and public service facilities.
- 4. The following criteria, amongst other matters, may be used to evaluate applications for intensification:
 - a. the suitability of the site in terms of size and shape of the lot, soil conditions, topography and drainage;
 - b. the compatibility proposed development on the existing and planned character of the area:
 - c. the provision of on-site landscaping, fencing, planting and other measures to lessen any impact the proposed development may have on the character of the area;
 - d. the availability of existing and planned infrastructure and public service facilities;
 - e. the provision of adequate ingress/egress, off street parking and loading facilities, and safe and convenient vehicular circulation;
 - f. the impact of traffic generated by the proposed development on the road network and surrounding land uses;
 - g. the availability of existing or planned, or potential to enhance, active transportation infrastructure:
 - h. impacts of the proposed development of surrounding natural features and areas and cultural heritage resources; and,
 - i. the relationship between the proposed development and any natural or manmade hazards.

Programs

- 1. Callander will disseminate information on methods of residential intensification and alternative forms of development to developers, builders and residents.
- 2. Callander will maintain an inventory of vacant sites suitable for intensification.
- 3. Callander will monitor progress towards the residential intensification target outlined in this Plan. Callander will review and, if necessary, adjust its policies and programs, including amending this Plan, to ensure that continued progress towards this target is made.

2.4 Garden Suites

Garden suites are a temporary dwelling unit that is accessory and subordinate to the primary dwelling unit and are designed to be portable. Garden suites support intensification, and attainable and affordable housing.

- 1. Garden suites may be permitted through a Temporary Use By-law and in accordance with the following:
 - a. one garden suite is allowed as an accessory unit on a lot with only one existing primary dwelling unit;
 - b. the garden suite can be adequately serviced and the services for the garden suite will be connected to the service lines or private services of the primary dwelling unit;
 - c. the garden suite will be removed at the termination of its use at no expense to Callander;
 - d. the garden suite is subject to the natural heritage features and areas, and natural hazard policies of this Plan; and,

- e. the garden suite must satisfy all applicable requirements of the *Ontario Building Code* and *Ontario Fire Code*.
- 2. Development standards for garden suites will be defined in the Zoning By-law. Garden suites may be exempt from the density limits established in the Zoning By-law.
- 3. Callander may require the owner of the Garden Suite or any other person to enter into an agreement to address such matters that Council considers necessary or advisable including installation, location maintenance, occupancy and removal of the structure.

Programs

1. Callander will disseminate information on garden suites to developers, builders and residents.

2.5 Additional Residential Units

Additional residential units are a dwelling unit that is accessory and subordinate to the primary dwelling unit. Additional residential units may be permitted within the primary dwelling unit or in an accessory building. Additional residential units support intensification, and attainable and affordable housing.

Policies:

- 1. Additional residential units are permitted in a or as an accessory structure to a single detached dwelling, semi-detached dwelling, row dwelling and a town house dwelling.
- 2. No more than two additional residential units are permitted in association with each primary dwelling on the same lot.
- 3. Additional residential units can be adequately serviced and the services for the additional residential units will be connected to the service lines or private services of the primary dwelling unit.
- 4. Additional residential units are subject to the natural heritage features and areas, and natural hazard policies of this Plan.
- 5. Additional residential units must satisfy all applicable requirements of the Ontario Building Code, Ontario Fire Code and Property Standards By-law.
- 6. Development standards for additional residential units will be defined in the Zoning By-law. Additional residential units may be exempt from the density limits established in the Zoning By-law.

Programs:

1. Callander will disseminate information on garden suites to developers, builders and residents.

3.0 Settlement Area Land Use Designations

Callander's Settlement Area contains a mix of land uses that are designated for long term growth and change. The Settlement Area land use designations include:

- Residential Area
- Downtown and Waterfront Area
- Employment Area
- Gateway Mixed Use Area
- Open Space and Parkland
- Environmental Protection Area

The Settlement Area land use designations are shown on Schedule X insert title. Development in these designations shall be guided by the policies of this section, together with all other applicable policies of this Plan.

3.1 Objectives

It is the objective of Callander to:

- a. Encourage land use intensification, and where possible, and have regard for the timely and efficient use of existing infrastructure;
- b. Promote resilient, efficient and sustainable land use patterns;
- c. Support the evaluation of growth-related infrastructure costs and financial implications of proposed works:
- d. Direct development to areas suitable for the provision of hard and soft municipal services:
- e. Encourage diversity in housing types and tenues;
- f. Preserve and enhance the vitality of the traditional main street character;
- g. Encourage and support the local business community to update and improve the Downtown and Waterfront Area particularly through the utilization of government programs;
- h. Maintain an adequate supply of vacant designated land to enable choice and flexibility, while recognizing the growth projected for the planning horizon and the need to develop in an orderly, efficient, timely, and affordable manner.

3.2 Residential Area

The Residential Area designation applies to lands that are intended primarily for a range and mix of residential uses and other land uses that are required to create a complete community, subject to certain criteria.

Policies:

1. All low, medium and high density forms of housing, and all tenures of housing, are permitted in the Residential Area, provided they are or can be serviced and subject to the policies of this Plan. Medium and high density forms of housing should be located on sites that front onto or are within a 5 minute walk (400 m) radius of arterial roads, collector roads and

- commercial areas. Residential Area land uses, densities and other development standards will be defined in the Zoning By-law.
- 2. Other land uses that are required to create complete communities are permitted in the Residential Area provided they are or can be serviced including parks and open spaces, local institutional uses and small scale commercial uses. These land uses, densities and other development standards will be defined in the Zoning By-law.
- 3. Bed and breakfast establishments with up to two accessory guest units are permitted in the Residential Area provided they are or can be serviced, subject to development standards defined in the Zoning By-law.
- 4. Home occupations and home industries are permitted in the Residential Area, provided they are or can be serviced, subject to development standards defined in the Zoning By-law.
- 5. Lot creation in the Residential Area is permitted in accordance the development standards set out in the Zoning By-law.
- 6. In considering a Zoning By-law Amendment in the Residential Area, Council will have regard to the following matters:
 - a. the suitability of the site in terms of size and shape of the lot, soil conditions, topography and drainage;
 - b. the compatibility of the proposed development on the existing and planned character of the area:
 - c. the provision of on-site landscaping, fencing, planting and other measures to lessen any impact that the proposed development may have on the character of the area;
 - d. the availability of existing and planned infrastructure and public service facilities;
 - e. the provision of adequate ingress/egress, off street parking and loading facilities, and safe and convenient vehicular circulation;
 - f. the impact of traffic generated by the proposed development on the road network and surrounding land uses;
 - g. the availability of existing or planned, or potential to enhance, active transportation infrastructure:
 - h. impacts of the proposed development of surrounding natural features and areas and cultural heritage resources; and,
 - i. the relationship between the proposed development and any natural or manmade hazards.

Program:

1. Callander will maintain an inventory of development trends that will be continuously monitored and updated on a regular basis to ensure that development objectives are being met, and to adjust the policies of this Plan as necessary.

3.3 Downtown Area

The Downtown Area designation applies to the commercial core and waterfront area, which is the dominant service and commercial centre serving residents of Callander and surrounding area. This section includes policies for the commercial core Downtown. Policies for the Waterfront are contained in Section 2.6 'Open Space and Parkland'.

Policies:

- 1. A wide variety of uses are permitted Downtown, consistent with its role and function as the dominant centre in the community. All residential, commercial, institutional and park and open space uses are permitted Downtown, provided they are or can be serviced and subject to the policies of this Plan. Light industrial uses may be permitted, subject to a Zoning Bylaw Amendment. Downtown land uses and development standards will be set out in the Zoning By-law.
- 2. Mixed use buildings, with commercial or institutional uses on the ground floor, and residential uses on the upper floors, are encouraged Downtown.
- 3. All new development or intensification shall be compatible with the existing and planned character of the area.
- 4. All new development or intensification abutting the Waterfront shall, as appropriate, provide public access to the shoreline, provide connectivity between public lands and preserve views of Lake Nipissing.
- 5. All new development and intensification, shall be subject to Section 13.5 Urban Design Guidelines.
- 6. All new development and intensification that substantially increases the useability of a site will be subject to Site Plan Control.
- 7. In considering a Zoning By-law Amendment in the Downtown, Council will have regard to the following matters:
 - a. the suitability of the site in terms of size and shape of the lot, soil conditions, topography and drainage;
 - b. the compatibility of the proposed development on the existing and planned character of the area:
 - c. the provision of on-site landscaping, fencing, planting and other measures to lessen any impact the proposed development may have on the character of the area;
 - d. the availability of existing and planned infrastructure and public service facilities;
 - e. the provision of adequate ingress/egress, off street parking and loading facilities, and safe and convenient vehicular circulation:
 - f. the impact of traffic generated by the proposed development on the road network and surrounding land uses;
 - g. the availability of existing or planned, or potential to enhance, active transportation infrastructure;
 - h. impacts of the proposed development of surrounding natural features and areas and cultural heritage resources; and,
 - i. the relationship between the proposed development and any natural or manmade hazards.

Programs:

- 1. Callander may designate the Downtown as a Community Improvement Project Area and prepare a Community Improvement Plan for the Community Improvement Project Area to help address market barriers associated with development Downtown.
- 2. Callander may prepare and implement detailed Downtown Streetscape and Urban Design Guidelines to create a high-quality and consistent approach is taken to the design of public and private spaces Downtown.

3.4 Employment Area

The Employment Area designation applies to lands that are intended to preserve and encourage the development of light industrial and commercial uses, subject to certain criteria.

- 1. A broad range of light Industrial, and commercial uses are permitted in the Employment Area subject to a rezoning and provided that that the development can be serviced in accordance with the policies of this Plan:
- 2. Adequate separation distances in accordance with the Land Use Compatibility D-Series Guidelines established by the Ministry of Environment, Conservation and Parks (MECP) must be demonstrated;
- 3. Open storage of goods and materials is permitted, and these uses shall be screened such that they are not visible from any abutting road or sensitive use;
- 4. All new industrial land uses are subject to the provisions of Section 9.6 Land Use Compatibility of this Plan;
- 5. All development in the Employment Area designation shall be subject to Site Plan Control;
- 6. Conversion of existing employment to non-employment uses may be considered through a comprehensive review of, or update to the Official Plan where it can be demonstrated that the lands are not required for employment purposes and that there is a need for the conversion, or through an amendment to this Plan where it can be demonstrated that:
 - a. The lands are not needed for employment purposes over the long term;
 - b. The lands are suitable for the proposed use;
 - c. The proposed use does not adversely impact the viability of any remaining employment areas or existing employment uses, including the following:
 - i. Incompatibility of land uses;
 - ii. The ability to provide appropriate buffering of employment uses from surrounding non-employment uses on and off-site;
 - iii. Interference with the function of the employment areas: and
 - iv. Accessibility to the employment areas.
 - d. The proposed lands can be serviced in accordance with the policies of this Plan
- 7. In considering a Zoning By-law Amendment in the Employment Area, Council will have regard for the following matters:
 - a. the suitability of the site in terms of size and shape of the lot, soil conditions, topography and drainage;
 - b. the compatibility of the proposed development on the existing and planned character of the area;
 - c. the provision of on-site landscaping, fencing, planting and other measures to lessen any impact the proposed development may have on the character of the area:
 - d. the availability of existing and planned infrastructure and public service facilities;
 - e. the provision of adequate ingress/egress, parking and loading facilities, and safe and convenient vehicular circulation;
 - f. the impact of traffic generated by the proposed development on the road network and surrounding land uses;

- g. the availability of existing or planned, or potential to enhance, active transportation infrastructure;
- h. impacts of the proposed development of surrounding natural features and areas and cultural heritage resources; and,
- the relationship between the proposed development and any natural or manmade hazards.

Programs:

1. Callander may designate the Employment Area as a Community Improvement Project Area and prepare a Community Improvement Plan for the Community Improvement Project Area to help address market barriers associated with the development of employment lands.

3.5 Gateway Mixed Use Area

The Gateway Mixed-Use Area designation applies to lands that are intended to be used for a range of commercial, employment, and medium and high-density residential uses to support economic growth and diversification within the community.

Policy:

- 1. Permitted uses include a broad range of light industrial, and commercial uses as well as medium and high-density residential uses, provided they are or can be serviced and subject to the policies of this plan;
- 2. Council in consultation with the Ministry of Environment, Conservation and Parks, or its successor, may consider alternative sustainable servicing schemes for the Gateway Mixed-Use where the servicing is:
 - a. Sustainable;
 - b. Compatible with the adjacent land uses; and
 - c. Staged in such a manner to provide assurances of the operation, maintenance and functioning of such a system prior to stages of expansion
- 3. All development in the Gateway Mixed Use Area designation shall be subject to Site Plan Control:
- 4. In considering a Zoning By-law Amendment in the Gateway Mixed Use Area, Council will have regard to the following matters:
 - a. the suitability of the site in terms of size and shape of the lot, soil conditions, topography and drainage;
 - b. the compatibility of the proposed development on the existing and planned character of the area;
 - c. the provision of on-site landscaping, fencing, planting and other measures to lessen any impact the proposed development may have on the character of the area:
 - d. the availability of existing and planned infrastructure and public service facilities;
 - e. the provision of adequate ingress/egress, off street parking and loading facilities, and safe and convenient vehicular circulation;
 - f. the impact of traffic generated by the proposed development on the road network and surrounding land uses;
 - g. the availability of existing or planned, or potential to enhance, active transportation infrastructure;

- h. impacts of the proposed development of surrounding natural features and areas and cultural heritage resources; and,
- i. the relationship between the proposed development and any natural or manmade hazards.

3.6 Open Space and Parkland

The Open Space and Parkland designation applies to all municipally, provincially and federally owned lands that are intended for parks, natural areas and waterfront, outdoor recreational and institutional spaces. Some lands under the Open Space and Parkland designation have been identified as being within the Downtown and Waterfront Area.

- To support the protection and enhancement of parks and open space and the important ecological, and recreational services they provide permitted uses are limited to recreational facilities such as community centres and arenas, conservation projects, managed forests, linear and multi-use trails, marinas, passive and active recreational uses, and essential public works and utilities;
- 2. commercial uses which are accessory to the primary use of open space such as snack bars or concession stands may be permitted, provided that the general intent and spirit of the Open Space and Parkland designation is maintained;
- 3. Any open spaces that are identified as natural heritage features and areas in Schedule X insert title of this Plan shall be protected as a permanent and long-term public resource. Policies contained in Section 7.0 Natural Heritage Features and Areas of this Plan shall apply to these lands;
- 4. As a condition of development, redevelopment, consent, plan of subdivision, or plan of condominium Callander will require the dedication of land for park or recreational purposes in accordance with the provisions of Section 42 of the *Planning Act.* At the Municipalities discretion they may require cash-in-lieu of parkland.
- 5. The conveyance of land for bicycle and pedestrian pathways is encouraged during development application review.
- 6. All major recreational uses shall be subject to Site Plan Control.
- 7. In considering a Zoning By-law Amendment in the Open Space and Parkland designation, Council will have regard to the following matters:
 - a. the suitability of the site in terms of size and shape of the lot, soil conditions, topography and drainage;
 - b. the compatibility of the proposed development on the existing and planned character of the area:
 - c. the provision of on-site landscaping, fencing, planting and other measures to lessen any impact the proposed development may have on the character of the area:
 - d. the availability of existing and planned infrastructure and public service facilities;
 - e. the provision of adequate ingress/egress, off street parking and loading facilities, and safe and convenient vehicular circulation;
 - f. the impact of traffic generated by the proposed development on the road network and surrounding land uses;
 - g. the availability of existing or planned, or potential to enhance, active transportation infrastructure;

- h. impacts of the proposed development of surrounding natural features and areas and cultural heritage resources; and,
- i. the relationship between the proposed development and any natural or manmade hazards.

Programs:

- 1. Callander will maintain an updated inventory and geographic database of municipal parks and open space properties, establish municipal parks classifications and protocol for updating these databases.
- 2. Callander may develop a multi-use trail system that connects major civic facilities, educational institutional, employment areas, the Downtown and Waterfront through open spaces by utilizing the development approval process with a view to developing these linkages for passive and active recreational uses as appropriate.
- 3. Callander may further delineate natural environment areas of municipal importance or in need of municipal protection along with appropriate strategies for conservational and acquisition.

3.7 Environmental Protection Area

The Environmental Protection Area designation applies to lands which contain physical characteristics, which could cause significant property damage or loss of life if development was permitted (i.e. flood plain, fish habitat, organic soils...etc.). The North Bay Mattawa Conservation Authority has jurisdiction over many of these areas.

Policies:

- 1. Permitted uses are restricted to archaeological activities, passive recreational uses, active transportation trails, watershed management and flood and erosion control projects carried out or supervised by a public agency.
- 2. Lands designated Environmental Protection Area are subject to the policies of Section 7.0 Natural Heritage Features and Areas and Section 9.0 Protecting Health and Safety of this report.

Programs:

1. Callander will maintain an updated inventory and geographic database of sensitive and hazardous features, and establish protocol for updates to these databases.

3.8 Conversion of Surplus Institutional Buildings

Where surplus institutional buildings exist within the Settlement Area of Callander, rezoning applications related to the conversion of surplus institutional buildings and the rezoning of vacant lands held by institutions will be considered, regardless of land use designation, based on the following criteria:

- a. the need for such lands or buildings for other public uses, and their long-term value to the community;
- b. the compatibility of the proposed uses with surrounding land uses and the intent of the policies in this Official Plan with respect to the proposed use;

- c. for conversion to residential uses, the appropriateness of the proposed density; and,
- d. the policies of Sections 2.1, 8.0, 10.0 and 12.5.

4.0 Rural Area Land Use Designations

Callander's Rural Area applies to all lands outside of the Settlement Area. The Rural Area contains a mix of land uses that are characteristic of a rural area including permanent residential, recreational residential, recreation-based commercial uses, agriculture and mineral mining resources and mineral aggregate resources and other natural areas.

The Rural Area designation complements the Settlement Area designation. The intent of this designation is to accommodate a variety of land uses that are appropriate for a rural location, especially those that provide rural economic benefits that are balanced with the protection of the natural environment and resource base. Intensive development on these lands is not desired, as more suitable locations within the Settlement Area have been identified for future growth. Callander does not intend to extend municipal water or sanitary services to the Rural Area. The Rural Area land use designations include:

- Rural Area
- Shoreline Area
- Island Area
- Mineral Mining Area
- Mineral Aggregate Area
- Open Space and Parkland
- Environmental Protection Area

The Rural Area land use designations are shown on Schedule X insert title. Development in these designations shall be guided by the policies of this section, together with all other applicable policies of this Plan.

4.1 Objectives

It is the objective of Callander to:

- 1. Recognize existing rural character and permit new rural development in accordance with the policies of this Plan;
- 2. Encourage the preservation of land to protect and enhance the natural environment;
- 3. Recognize existing rural uses and permit appropriate residential, commercial and industrial development in accordance with the policies of this Plan;
- 4. Protect existing agricultural operations from uses that would impede productive agricultural operations;
- 5. Recognize existing aggregate extraction uses and permit new or expansions to existing uses subject to the policies of this Plan, and protect aggregate extraction uses from incompatible land uses and minimize negative effects on neighborhoods;
- 6. Enhance recreational services within the rural area and connect the rural area to the settlement area and surrounding communities through improved trail systems.

4.2 Rural Area

he Rural Area designation applies to lands outside of the Settlement Area and that are intended to protect Callander's natural amenities while providing opportunities for agriculture, agricultural-related uses and on-farm diversified uses, resource-based activities, such as forestry, mineral mining and mineral aggregate operations and other industrial uses that are not permitted in the Settlement Area, as well as small scale-commercial, institutional, recreational and appropriate rural residential uses. The amount and type of development in the Rural Area shall be consistent with maintaining its rural, natural heritage landscape.

- Low density residential uses, agricultural uses, agriculture related uses, on-farm diversified uses, rural institutional, commercial and industrial uses, resort commercial uses, resource based uses, such as forestry, mining and mineral aggregate, conservation, open space, natural resource management activities and linear open space trails are permitted in the Rural Area, subject to the policies of this Plan.
- 2. Low density residential uses are permitted in accordance with the following policies:
 - a. rural residential development will be compatible with the character of the surrounding existing uses, provided no additional public services, including the extension or creation of full or partial services would be required;
 - b. one single detached dwelling is permitted on any existing vacant legal lot of record, provided that it fronts onto a road that is publicly owned and maintained year round;
 - c. an individual mobile home unit or individual modular home unit is permitted as a single detached dwelling unit, provided it is constructed in accordance with the Ontario Building Code;
- 3. Garden suites are permitted in accordance with Section 2.4. Notwithstanding these policies a mobile home may be used as a garden suite provided that it is constructed in accordance with the *Ontario Building Code*, and a garden suite may be served by its own individual water and sewage service, where appropriate. None of these policies are intended to result in the creation of a new residential lot in the Rural Area;
- 4. Additional residential units are permitted in accordance with Section 2.5. Notwithstanding these policies a mobile home may be used as an additional dwelling unit in an accessory structure provided that it is constructed in accordance with the *Ontario Building Code*, and such accessory structure may be served by its own individual water and sewage service, where appropriate. None of these policies are intended to result in the creation of a new residential lot in the Rural Area;
- 5. New residential lot creation is permitted in the Rural Area in accordance with the following policies:
 - a. new rural residential lots must have frontage on a road that is publicly owned and maintained year round and is adequately served by hydro, waste collection, school busing, police services, fire services and paramedic services;
 - b. new rural residential lots must be compatible with their surroundings and comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 9.6 Land Use Compatibility:
 - c. new rural residential lots must protect and enhance rural natural heritage features and areas as described in Section 7.0 Natural Heritage Features and Areas;

- d. the parcel to be severed and parcel to be retained must be at least 1.0 hectares in area and have at least 45 metres of frontage along a publicly owned and maintained road:
- e. up to three new parcels may be created from a parent parcel of land based on the date of the adoption of this Official Plan; and,
- f. rural estate subdivisions may be permitted through an Official Plan Amendment, Rezoning and Plan of Subdivision and/or Condominium to ensure that the proposed development meets local and provincial land use planning interests and objectives.
- 6. Hunt camps are considered to be seasonal camps used for hunting and fishing, in accordance with the following policies:
 - a. A new hunt camp may be constructed on patent lands or Crown lands that do not have direct access to a public road, subject to provincial and local requirements;
 - b. Where access to a new hunt camp is proposed by means other than direct access to a maintained Municipal Road or Provincial Highway the property owner9s) shall be required to enter into an agreement with Callander to recognize the proposed access and absolve Callander of any liability associated with the access.
 - c. Development standards for hunt camps will be defined in the Zoning By-law; and
 - d. The transfer of a hunt camp from the Crown to private ownership shall be subject to a Zoning By-law Amendment. The intent of the amendment is to consider an exemption from the established zoning requirement for the creation of new lots. It will also be a requirement of the amendment that the structure(s) and septic system comply with the *Ontario Building Code Act*.
- 7. Agriculture, agriculture-related and on-farm diversified uses are permitted, in accordance with the following policies:
 - a. agricultural uses, including farm operations, agriculture-related uses, on-farm diversified uses, and normal farm practices, are permitted. This includes small-scale agricultural uses, such as homesteading, and the growing of cannabis, which is an agricultural use.
 - b. new land uses, the expansion of existing land uses, the creation of lots, and new or expanding livestock facilities must be compatible with their surroundings and comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 10.6 Natural Heritage Features and Areas, including the Minimum Distance Separation Formula; and,
 - c. new land uses, the expansion of existing land uses, the creation of new lots, must protect and enhance rural natural heritage features and areas as described in Section 8.0 Land Use Compatibility. Existing agricultural uses are permitted to continue in and adjacent to natural heritage features and areas.
- 8. Rural institutional, commercial and industrial land uses are permitted in accordance with the following policies:
 - Existing minor institutional uses such as places of worship, community centres, open spaces and parks, and clubs are permitted and will be recognized in the Zoning Bylaw. New minor institutional uses may be permitted through a Zoning By-law Amendment;
 - b. Existing rural commercial and industrial land uses are permitted and will be recognized in the Zoning By-law. New rural commercial and industrial land uses are encouraged and will be permitted through a Zoning By-law Amendment;
 - c. New land uses, the expansion of existing uses and the creation of new lots must have frontage on a publicly owned and maintained road, be adequately serviced, comply with the minimum setbacks required to achieve land use compatibility with

- other rural land uses as described in Section 9.6 Land Use Compatibility, and protect and enhance rural natural heritage features and areas as described in Section 7.0 Natural Heritage Features and Areas;
- d. New land uses and the expansions that substantially increase the useability of an existing use will be subject to Site Plan Control;
- 9. Rural resort commercial uses are permitted in accordance with the following policies:
 - a. Rural resort commercial uses include resort hotels, lodges, campgrounds, other tourist-oriented accommodations and uses and related outdoor recreational uses and accessory uses, including restaurants and retail shops.
 - b. Existing rural resort commercial uses are permitted and will be recognized in the Zoning By-law. New rural resort commercial uses are encouraged and will be permitted through a Zoning By-law Amendment;
 - c. New land uses, the expansion of existing uses and the creation of new lots must have frontage on a publicly owned and maintained road, be adequately serviced, comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 10.6, and protect and enhance rural natural heritage features and areas as described in Section 7.0 Natural Heritage Features and Areas; and,
 - d. New land uses and the expansions that substantially increase the useability of an existing use will be subject to Site Plan Control.
- 10. Resource related uses are permitted in accordance with the following policies:
 - a. resource related uses include forestry, mineral aggregate operations and mineral mining operations, including exploration and advanced exploration. Existing resource related uses are permitted and will be recognized in the Zoning By-law. New resource related uses are encouraged and will be permitted through a Zoning By-law Amendment.
 - b. new land uses, the expansion of existing uses and the creation of new lots must have frontage on a road, be adequately serviced, comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 9.6 Land Use Compatibility, and protect and enhance rural natural heritage features and areas as described in Section 8.0 Natural Heritage Features and Areas;
 - c. forestry operations are encouraged to follow sound forest management practices and shall be set back from all shorelines an appropriate distance so that clearing and cutting operations do not impact the visual quality and character of the shoreline. Clear cutting shall be prohibited within 500 metres of Callander Bay, unless carried out in accordance with sound forest management practices, and maintaining appropriate vegetation buffers; and,
 - d. new land uses and the expansions that substantially increase the useability of an existing use will be subject to Site Plan Control.

4.3 Shoreline Area

The Shoreline Area designation applies to lands along the shoreline of Callander Bay and the South Shore outside of the Settlement Area. This designation recognizes the areas of existing or future development adjacent to Lake Nipissing. It is intended to ensure that future development maintains or improves Lake Nipissing's water quality, protects natural heritage features and areas, such as fish habitat, preserves visual qualities that attract people to the waterfront and maintain and protect the character of shoreline residential areas.

- 1. Low density residential uses, resort commercial uses, open spaces and parks are permitted in the Shoreline Area, subject to the policies of this Plan.
- 2. Low density residential uses, including single detached dwellings and recreational dwellings are permitted in accordance with the following policies:
 - a. new low density residential development shall be compatible with the existing and planned character of the area, serviced with individual water and sanitary services appropriate for existing and planned infrastructure and public service facilities.
 - b. new low density residential development shall be set back 20 metres from the high water mark. Within this setback a shoreline buffer of 15 metres will be created and maintained. Up to 10 percent of trees and vegetation within the shoreline buffer may be removed to provide access and/or view corridors to the water:
 - c. development standards for low density residential development shall be set out in the Zoning By-law;
 - d. one single detached dwelling or one recreational dwelling is permitted on any existing vacant legal lot of record, provided that it fronts onto a road that is publicly owned and maintained year round; and
 - e. an individual mobile home unit or individual modular home unit is permitted as a single detached dwelling or recreational dwelling, provided it is constructed in accordance with the Ontario Building Code;
- 3. All development shall eb setback at least 20 metres form the high water mark of a surface water feature, excluding shoreline accessory structures. Within this setback a vegetative buffer of 15 metres will be created and maintained. Up to 10 percent of the trees and vegetation within the shoreline buffer may be removed to provide access and/or view corridors to the surface water feature.
- 4. Garden suites are permitted in accordance with Section 2.4.Garden Suites of this Plan. Notwithstanding these policies a mobile home may be used as a garden suite provided that it is constructed in accordance with the *Ontario Building Code*, and a garden suite may be served by its own individual water and sewage service, where appropriate. None of these policies are intended to result in the creation of a new residential lot in the Shoreline Area.
- 5. Additional residential units are permitted in accordance with Section 2.5 Additional Residential Units. Notwithstanding these policies a mobile home may be used as an additional dwelling unit in an accessory structure provided that it is constructed in accordance with the *Ontario Building Code*, and such accessory structure may be serviced by its own individual water and sewage service, where appropriate. None of these policies are intended to result in the creation of a new residential lot in the Shoreline Area.
- 6. New residential lot creation is permitted in the Shoreline Area in accordance with the following policies:
 - a. new residential lots must have frontage on a road that is publicly owned and maintained year round and is adequately serviced by hydro, waste collection, school busing, police services, fire services and paramedic services;
 - b. new residential lots must be compatible with their surroundings and comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 9.6 Land Use Compatibility;
 - c. new residential lots must protect and enhance rural natural heritage features and areas as described in Section 7.0 Natural Heritage Features and Areas;

- d. the parcel to be severed and parcel to be retained must be at least 1.0 hectares in area, have at least 100 metres of shoreline frontage and at least 10 metres of frontage along a publicly owned and maintained road;
- e. residential development proposals involving more than three new residential dwelling units may be permitted through an Official Plan Amendment, Rezoning and Plan of Subdivision and/or Condominium to ensure that the proposed development meets local and provincial land use planning interests and objectives.
- 7. Callander Bay is at capacity from a development and water quality perspective. This means that phosphorous levels in the Bay exceed provincial water quality objectives. Generally, un-serviced development, including the creation of new lots within 300 metres of Callander Bay and the Wasi River is restricted and will not be considered. Callander may consider lot creation where it can be demonstrated that one or more of the following policies can be met:
 - a. drainage of the proposed lot flows to a separate, non-sensitive watershed as a result of the physical features of the property;
 - b. detailed site specific hydrogeological study demonstrating that the drainage of the sewage effluent effectively results in a circuitous flow path that extends for at least 300m before reaching the waterbody:
 - c. sewage disposal system will result in no adverse affect on water quality;
 - d. any conventional sewage disposal system to serve new development will be setback a minimum of 300 m from the high water mark; and,
 - e. a detailed site specific hydrogeological and soil study which assesses phosphorus distribution, migration velocity and long-term soil retention capabilities.
- 8. New development that meets one or more of the above policies outlined in Section 4.3.6 will be required to enter into Site Plan Control agreement to address erosion and sediment control, stormwater management, the installation and maintenance of phosphorous removing septic systems and maintenance of the required shoreline setback and shoreline buffer.
- 9. Residential development applications may be required to submit a Site Evaluation Report that would describe the site and surrounding area, including natural heritage features and areas and natural hazards, the proposed development, the impact and constraints associated with the proposed development, and how the impacts and constraints can be managed or mitigated in accordance with good land use planning practices.
- 10. New septic systems shall be set back 30 metres from the high water mark. Holding tanks are not permitted in the Shoreline Area. Property owners are encouraged to regularly inspect and maintain their septic systems and to replace or upgrade their septic system, when necessary and appropriate.
- 11. Shoreline resort commercial uses are permitted in accordance with the following policies:
 - a. Shoreline resort commercial uses include resort hotels, motels, lodges, campgrounds, other tourist-oriented accommodations and uses and related outdoor recreational uses and accessory uses, including restaurants and retail shops.
 - b. Existing shoreline resort commercial uses are permitted and will be recognized in the Zoning By-law. New shoreline resort commercial uses are encouraged and will be permitted through a Zoning By-law Amendment. The conversion of existing shoreline resort commercial uses to residential uses is discouraged and will require a Zoning By-law Amendment;

- c. New land uses, the expansion of existing uses and the creation of new lots must have frontage on a publicly owned and maintained road, be adequately serviced, comply with the minimum setbacks required to achieve land use compatibility with other shoreline land uses as described in Section 9.6, and protect and enhance shoreline natural heritage features and areas as described in Section 7.0; and,
- d. New land uses and the expansions that substantially increase the useability of an existing use will be subject to Site Plan Control.

Programs

- 1. Callander and its partners may undertake a lake capacity study of Callander Bay and the Wasi River on a regular, periodic basis to understand lake water quality issues, opportunities, constraints and trends.
- 2. Callander may undertake a land use survey of the Shoreline Area and associated lands to monitor development application trends and changes to the character of the area, including waterfront setbacks and shoreline buffer areas.

4.4 Island Area

The Island Area designation applies to the islands within Callander Bay. This designation recognizes the areas of existing and future development on the islands. It is intended to ensure that future development maintains or improves the water quality of Lake Nipissing, protects natural heritage features and areas, such as fish habitat, preserves visual qualities that attract people to the waterfront and maintain and protect the character of Callander Bay.

- 1. Low density residential uses and open space and park uses are permitted in the Island Area designation, subject to the policies of this Plan.
- 2. Low density residential uses, including single detached dwellings and recreational dwellings are permitted in accordance with the following policies:
 - a. new low density residential development shall be compatible with the existing and planned character of the area, serviced with individual water and sanitary services and appropriate for existing and planned infrastructure and public service facilities;
 - b. new low density residential development shall be set back 20 metres from the high water mark. Within this setback a shoreline buffer of 15 metres will be created and maintained. Up to 10 percent of trees and vegetation within the shoreline buffer may be removed to provide access and/or view corridors to the water;
 - c. development standards for low density residential development shall be set out in the Zoning By-law;
- 3. New residential lot creation is permitted in the Island Area in accordance with the following policies:
 - a. new lots will be water access only and will be serviced by public or private water access points with adequate boat docking facilities and adequate off-street parking facilities;

b. new lots must be at least 1.0 hectares in area and have at least 100 metres of lot frontage.

Programs:

1. Callander will explore the feasibility of re-establishing the Municipal Marina, including docking facilities.

4.5 Mineral Mining Area

The Mineral Mining Area designation applies to lands outside of the Settlement Area that has been identified by the Province of Ontario has having high provincially significant mineral potential, given the presence of the Callander Bay carbonatite complex. The intent of this designation is to encourage the development of this resource and to protect it from development or activities that would preclude or hinder its use or which would be incompatible for reasons of public health, public safety and environmental impact.

Policies:

- 1. Mineral exploration, advanced exploration, mineral mining, mining rehabilitation and mining-related uses are permitted in the Mineral Mining Area, subject to the policies of this Plan;
- 2. Other resource-based land uses such as forestry and aggregate, recreation, open space and parks and wildlife management may be permitted provided they do not preclude future extraction.
- 3. Other land uses, including the creation of residential lots, that would preclude or hinder the establishment of new operations or access to the resource are not permitted unless:
 - a. the resource use would not be feasible;
 - b. the proposed land use or development serves a greater long-term public interest;
 - c. issues of public health, public safety and environmental impact are addressed;
- 4. New advanced exploration and mineral mining proposals may be permitted subject to a Zoning By-law Amendment;
- 5. New advanced exploration and mineral mining proposals must be compatible with their surroundings and comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 9.6 Land Use Compatibility;
- 6. New advanced exploration and mineral mining proposals must protect and enhance rural natural heritage features and areas as described in Section 7.0 Natural Heritage Features and Areas; and,
- 7. Rehabilitation to accommodate subsequent land uses shall be required after extraction and other related activities have ceased. Progressive rehabilitation should be undertaken, whenever feasible.

4.6 Mineral Aggregate Area

The Mineral Aggregate Area designation applies to lands outside of the Settlement Area that are licensed aggregate sites and lands that have been identified by the Province of Ontario as having secondary significance. The intent of this designation is to encourage the development of this resource and to protect it from development or activities that would preclude or hinder its use or which would be incompatible for reasons of public health, public safety and environmental impact.

Policies:

- 1. Mineral aggregate operations are permitted in the Mineral Aggregate Area, subject to the policies of this Plan;
- 2. Mineral aggregate resource conservation shall be undertaken, including through the use of accessory aggregate recycling facilities within operations, wherever feasible;
- 3. Other resource based land uses such as forestry, mineral exploration, recreation, open space and parks and wildlife management may be permitted provided they do not preclude future extraction;
- 4. Other land uses, including the creation of residential lots, that would preclude or hinder the establishment of new operations or access to the resource are not permitted unless:
 - a. the resource use would not be feasible:
 - b. the proposed land use or development serves a greater long-term public interest; and,
 - c. issues of public health, public safety and environmental impact are addressed.
- 5. New mineral aggregate operations may be permitted subject to a Zoning By-law Amendment.
- 6. New mineral aggregate operations must be compatible with their surroundings and comply with the minimum setbacks required to achieve land use compatibility with other rural land uses as described in Section 9.6 Land Use Compatibility;
- 7. New mineral aggregate operations must protect and enhance rural natural heritage features and areas as described in Section 7.0 Natural Heritage Features and Areas; and,
- 8. Progressive and final rehabilitation shall be required to accommodate subsequent land uses, to promote land use compatibility, to recognize the interim nature of extraction and to mitigate negative impacts to the extent possible.
- 9. Wayside pits and quarries, portable asphalt plants and portable concrete plants used on public authority contracts are permitted in all areas except those areas of existing development or environmental sensitivity which have been determined to be incompatible with aggregate extraction and its associated activities.

4.7 Open Space and Parkland

The Open Space and Parkland designation applies to lands intended for conservation, linear trail corridors, golf courses, marinas and established parks. The intent of Callander is to manage open space and parkland in a sustainable manner by encouraging the preservation of present and future linear trails systems to be utilized by the residents and visitors of Callander, and providing opportunities for outdoor recreation for residents and tourist.

- 1. Permitted uses include: arenas, community centres, conservation uses, forestry uses in accordance with good management practices, golf courses, linear multi-use trails, marinas, passive and active recreational uses, and public and private parks and facilities.
- 2. Callander recognizes the significance of the park areas fronting on Callander Bay and shall maintain and develop the parks for recreational use.
- 3. Where lands designated Open Space and Parkland are owned by the Crown, Callander has no planning control. Callander will encourage the Province of Ontario to consult with

- Council on all decisions with respect to the future use, development, or disposition of Crown owned lands within Callander.
- 4. The uses of privately owned lands in the Open Space and Parkland designation include active recreational uses such as golf courses. It is a policy of this Plan that uses shall be limited to existing uses and activities and related facilities and operations.
- 5. An Environmental Impact Study may be required prior to the approval of utilities, golf courses, services playing fields, campgrounds or other uses in an open space designation where environmentally sensitive lands may be affected;
- 6. Callander will ensure that all natural environment land uses are consistent with the environmental policies of this Plan.
- 7. Development will generally be directed away from any natural hazards, such as flood prone areas and significant slopes. Where development is permitted, mitigation measures will be required to reduce the threat of the hazard.
- 8. Callander shall generally protect and enhance open space within the municipal boundary and identify locally significant natural areas for restoration and enhancement where appropriate. Callander shall encourage protection and planting of native vegetation within Municipally owned open space areas where appropriate.
- 9. Callander will support and participate in, as appropriate, the initiative of other agencies and interest groups to expand and interconnect existing linear trail system.
- 10. Any major recreational use in this designation shall be subject to Site Plan Control.

Programs:

- 1. Callander will maintain an updated inventory and geographic database of municipal parks and open space properties, establish municipal parks classifications and protocol for updating these databases.
- 2. Callander may develop a multi-use trail system that connects major civic facilities, educational institutional, employment areas, the Downtown and Waterfront through open spaces by utilizing the development approval process with a view to developing these linkages for passive and active recreational uses as appropriate.
- 3. Callander may further delineate natural environment areas of municipal importance or in need of municipal protection along with appropriate strategies for conservational and acquisition.

4.8 Environmental Protection Area

The Environmental Protection Area designation applies to lands which contain natural features or ecological functions of Provincial and local significant as identified by the Province, Conservation Authority or Callander. These lands possess physical characteristics, which would cause severe property damage or loss of life if development was permitted. The physical characteristics include flood and erosion susceptibility, organic soils and extreme slopes. The areas also include significant wildlife habitat, fish habitat and wetlands. The hazard areas and environmentally sensitive areas are combined in this designation to define lands that should not be developed. The North Bay Mattawa Conservation Authority has jurisdiction over many of these areas.

- 1. Permitted uses include: archaeological activities; forestry and resource management uses where undertaken in a manner that minimizes any potential impact on the natural features and functions of the area; passive recreational uses, such as nature viewing and pedestrian trail activities; snowmobiling and biking trails; and, watershed management and flood and erosion control projects carried out or supervised by a public agency.
- 2. Any proposed alteration to an Environmental Protection Area shall be supported by appropriate justification in the form of an Environmental Impact Assessment.
- Lands designated Environmental Protection Area are subject to the policies of Section 7.0
 Natural Heritage Features and Areas and Section 9.0 Protecting Health and Safety of this
 report.

Programs:

1. Callander will maintain an updated inventory and geographic database of sensitive and hazardous features, and establish protocol for updates to these databases.

5.0 Housing

Housing is a basic human right. There is ample evidence that demonstrates that attainable and affordable housing is central to achieving various economic and social outcomes.

Land use planning can support access to attainable and affordable housing by ensuring that there is an adequate supply of land that accommodates a variety of housing options, by permitting and facilitating all forms of housing, by ensuring the efficient use of land and effective business processes.

Callander is projected to grow steadily over the lifespan of this Plan. This growth, combined with the continued aging of the population, is expected to result in demand for approximately 285 new dwelling units.

Callander recognizes the need, importance and opportunities for a diverse range of housing types, densities and tenure. The housing policies are intended to facilitate the creation of a wide range of attainable and affordable housing opportunities in the community and guide the continued shift in dwelling unit types towards more intensive forms of development within the Settlement Area, where infrastructure and public service facilities exist or are planned.

Objectives:

- 1. Encourage diversity in housing types, and tenures to promote a full range of housing, including affordable housing and appropriate to low income groups and people with special needs:
- 2. Promote residential intensification in the Settlement Area;
- 3. Support and promote accessibility within the housing market for persons with disabilities
- 4. Callander will, at all times, maintain at least a fifteen (15) year supply of land designated and available for residential development, redevelopment, and residential intensification; and
- 5. Callander will endeavour to maintain a minimum three (3) year continuous supply of residential units with servicing capacity in draft approved or registered plans.

5.1 Housing Types and Tenures

Single detached homes are the pre-dominant dwelling unit type in Callander. As Callander's population continues to grow and age, it is anticipated that demand for dwelling unit types will continue to shift towards relatively more intensive forms of dwelling units such as semi-detached, duplexes, row houses and apartment dwelling unit types. The housing policies are intended to guide this shift in dwelling unit types and continue to diversify the mix of dwelling unit types.

Home ownership is the pre-dominant dwelling unit tenure in Callander. Housing needs are anticipated to change. Diverse housing options includes a range of tenures to support the current and future needs of the community. A lack of rental housing has been identified as a concern in Callander. The housing policies are intended to encourage a more balanced mix of tenure types, including ownership, rental and innovative tenures such as shared housing.

Policies:

- 1. Callander will encourage a range of housing types and tenures to meet the current and future needs of residents;
- 2. Callander will aim to diversify its housing supply resulting in a mix of 70 percent single detached units, 20 percent medium density units and 10 percent high density units in the lifetime of this Plan:
- 3. Callander will aim to diversify its housing supply tenure resulting in a mix of 75 percent ownership and 25 percent rental tenure, during the lifetime of this Plan; and
- 4. Callander encourages innovative tenure options including home sharing.

Programs:

 Callander will explore options to discourage or prohibit the conversion of rental housing to ownership housing when rental vacancy rates fall below a certain threshold in the community.

5.2 Attainable and Affordable Housing

The intent of this Plan is to encourage the provision of an appropriate range of attainable and affordable housing opportunities throughout the community.

- Callander will provide an appropriate range and mix of housing options and densities to meet projected market-based and affordable housing needs of current and future residents by:
 - a. Ideally 25% of dwelling units will be affordable to low and moderate income households;
 - b. permitting and facilitating and permitting all housing options required to meet the needs of current and future residents, in accordance with the policies of this Plan;
 - c. permitting and facilitating intensification, in accordance with Section 2.3;
 - d. supporting innovative housing options such as shared housing or tiny homes;
 - e. directing the majority of new dwelling units to the Settlement Area, where infrastructure and public service facilities are available or planned to be available; and,

f. reviewing and creating development standards that use land, resources, infrastructure and public service facilities efficiently.

Programs:

- 1. Callander will review and adjust its development standards on an ongoing basis to ensure that the development standards support the creation of attainable and affordable housing options.
- 2. Callander will develop and maintain an inventory of sites suitable for attainable and affordable housing.
- 3. Callander will develop an Attainable and Affordable Housing Community Improvement Plan to support the creation of attainable and affordable housing options through land banking, pre-servicing and incentives, amongst other tools.
- 4. Callander will create and maintain an inventory of attainable and affordable housing funding opportunities.
- 5. Callander will collaborate with its public and private sector partners to create attainable and affordable housing opportunities.
- 6. Callander will collaborate with this public and private sector partners to leverage and maximize attainable and affordable housing funding opportunities.

5.3 Supportive Housing

Supportive housing refers to a broad range of housing options and living arrangements for current and future residents that have specific needs. It includes things like home and community care arrangements, retirement homes, long term care homes, custodial housing, supportive housing and supported housing, amongst others. The housing policies are intended to recognize and facilitate these housing types in appropriate locations in the community.

Policies:

1. Supportive housing is permitted in the Residential, Downtown and Gateway Mixed Use Area in the Settlement Area. Supportive housing that involves home and community care arrangements is also permitted in the Rural Area. These land uses and associated development standards will be defined in the Zoning By-law.

5.4 Short-Term Rentals

Short term rentals are all or part of a dwelling unit that is used to provide temporary accommodations for a period that is generally 30 days or less. This excludes bed and breakfast establishments, resorts, and motels/hotels. Short term rentals are considered to be a commercial use and can support tourism opportunities by providing a wider selection of accommodations.

Policies:

1. Short term rentals are permitted in the Residential, Downtown, Gateway Mixed Use, Rural, Shoreline and Island Areas, in accordance with the policies of this Plan. Development standards for short term rentals will be defined in the Zoning By-law.

Programs:

1. Callander will create a short term rental accommodation framework that addresses information, education, registration, licensing, regulation, taxation and enforcement for short term rentals.

5.5 Universal Design and Accessibility

Universal design refers to housing that incorporates, at the design and construction stage, the ability to make future changes easily and with minimum expenses, to meet the evolving needs of its occupants. It shall be the policy of Callander to:

- 1. Encourage all housing providers to design and develop barrier free housing;
- 2. Encourage the use of universal design features for new residential development, redevelopment and intensification;
- 3. Work with community based accessibly organizations to disseminate information to housing providers on approaches to the provision of barrier free housing; and,
- 4. Monitor on an ongoing basis the availability of modified units within the social housing sector to determine the suitability of these unit sin relation to identified needs.

5.6 Mobile Homes and Mobile Home Parks

Mobile homes are considered a form of attainable and affordable housing, and are similar to a single detached dwelling.

Policies:

- 1. Mobile homes will be permitted in accordance with the policies of this Plan.
- 2. Mobile home parks may be permitted through a Zoning By-law Amendment. Such applications shall consider such factors as proposed land uses, densities, servicing, utilities, internal design, aesthetics, landscaping, and the physical relationship of the mobile home park to existing adjacent development. Access points shall be limited in number and designed to minimize conflict with pedestrian and vehicular traffic
- 3. Mobile home parks shall generally be developed, owned and operated as a single unit. Ownership and maintenance of internal roads, services, common elements, open space areas, and buildings shall be the responsibility of the owner.
- 4. New mobile home parks will be subject to Site Plan Control.

6.0 Water Resources

Callander's drinking water sources are Callander Bay and private wells. Callander Bay serves as the drinking water source for the Settlement Area, which is serviced by a water intake pipe in the Bay. The Rural Area is serviced by surface and groundwater drinking water sources. Callander Bay serves as a defining feature of the community, recreational asset and habitat for a variety of flora and fauna species. Callander Bay is fed by the Wasi River. The intent of this Plan is to recognize the importance of these surface and ground water features and to protect and enhance the features for the benefit of current and future residents.

Objectives:

- 1. To protect surface and groundwater drinking water sources from proposals that have the potential to contaminate and threaten Callander's drinking water supplies; and
- 2. To protect and enhance the water quality in Callander Bay and the Wasi River

6.1 Source Water Protection

The North Bay Mattawa Source Protection Plan includes policies aimed at ensuring that significant threats to this drinking water source are monitored and managed to reduce the threat of contamination. The Source Protection Plan defines an Intake Protection Zone (IPZ) around the Callander Bay intake that is comprised of three distinct zones based on the length of time that it would take for a contaminant to enter and natural environment and reach to intake pipe. These Intake Protection Zones are shown on Schedule X insert title.

Policies:

- Pesticide storage, road salt storage, nutrient handling and storage, livestock activity, snow storage facilities and waste disposal sites represent significant threats in IPZ 1 and 2 and are not permitted in IPZ 1 and IPZ 2. Waste disposal sites also represent a significant drinking water threat in IPZ 3, or Callander Issue Contributing Area, and are not permitted in the IPZ 3.
- 2. All major development applications in the Rural Area serviced by individual wells, or in close proximity to existing development serviced by individual wells, will be supported by a Hydrogeological Report.
- 3. Callander will consult with the North Bay Mattawa Conservation Authority on all development applications within the IPZ 1, IPZ 2 and IPZ 3.

6.2 Callander Bay

Callander Bay is at capacity from a development and water quality perspective. This means that phosphorous levels in the Bay exceed provincial water quality objectives. Generally, unserviced development, including the creation of new lots within 300 metres of Callander Bay and the Wasi River is restricted and will not be considered. Callander may consider lot creation where it can be demonstrated that one or more of the following policies can be met:

- 1. Drainage of the proposed lot flows to a separate, non-sensitive watershed as a result of the physical features of the property;
- 2. Detailed site specific hydrogeological study demonstrating that the drainage of the sewage effluent effectively results in a circuitous flow path that extends for at least 300m before reaching the waterbody;
- 3. Sewage disposal system will result in no adverse affect on water quality;
- 4. Any conventional sewage disposal system to serve new development will be setback a minimum of 300 m from the high water mark; and,
- 5. A detailed site specific hydrogeological and soil study which assesses phosphorus distribution, migration velocity and long-term soil retention capabilities.

6.3 Surface Water Features

Surface water features refers to any waterbody or watercourse such as lakes, rivers, streams, creeks and other natural watercourses. Surface water features do not include artificial features

such as human made ponds, drainage channels, irrigation channels, stormwater management facilities or other similar features (i.e., lakes, rivers, streams, creeks and other natural watercourses). They are a valuable resource that provides various ecological services, habitat for aquatic and terrestrial life and recreational services such as boating.

Policies:

- 1. All development shall be set back at least 20 metres from the high water mark of a surface water feature, excluding shoreline accessory structures. Within this setback a vegetative buffer of 15 metres will be created and maintained. Up to 10 percent of the trees and vegetation within the shoreline buffer may be removed to provide access and/or view corridors to the surface water feature.
- 2. New septic systems shall be set back 30 metres from the high water mark of a surface water feature. A lesser setback may be considered through a Zoning By-law Amendment. Property owners are encouraged to regularly inspect and maintain their septic systems and to replace or upgrade their septic system, when necessary and appropriate.
- 3. All new development or expansions to existing development that substantially increase the usability of the development will be subject to Site Plan Control.
- 4. Development and site alteration on, abutting and adjacent to surface water features may be subject to the requirements of the North Bay Mattawa Conservation Authority. Callander will consult with the North Bay Mattawa Conservation Authority on all such applications.

7.0 Natural Heritage Features and Areas

A healthy natural environment is critical to Callander's sustainability. The natural and built environments are part of a broader inter-connected ecosystem. Forests, wetlands, streams, waterfront and parks and open spaces provide habitat for various aquatic and terrestrial species and contribute to clean air, water, and soil. Natural heritage features and areas and the functions they provide will be protected and preserved. The built environment will respect, preserve, and protect the natural environment, ensuring the sustainability of the community in the long term.

Callander's natural heritage features and areas include the Callander Bay Provincially Significant Wetland, other wetlands, significant habitat of endangered and threatened species, significant wildlife habitat, fish habitat and Callander's forests and trees. Known natural heritage features and areas are designated Environmental Protection Area, as shown on Schedule X insert title. The intent of this designation is to preserve and protect these features and to restrict the alteration of the physical and/or biological features of these lands.

7.1 Wetlands

Wetlands provide many valuable environmental and economic functions as wildlife habitat, water filters and flood attenuation structures. They are areas of swamps, bogs, marshes, or fens which are valuable in their natural state for biological, social, or hydrological reasons. These include Provincially Significant Wetlands and other wetlands. These wetlands are shown on Schedule X insert title

7.1.1 Callander Bay Provincially Significant Wetland

The Callander Bay Provincially Significant Wetland (PSW) has been identified, mapped and scored using a scientific point based ranking system known as the Ontario Wetland Evaluation System. The Callander Bay PSW is also considered to be significant wildlife habitat as it acts as a critical location for breeding, moulting and staging of bird species.

Policies:

- 1. Development and site alteration in the Callander Bay PSW is prohibited.
 - a. open space and passive recreational uses which do not involve site alterations and do not adversely affect the natural features or ecological functions of the wetland,
 - b. conservation uses which improve the ecological functions of the wetland, and
 - c. uses of a scientific or educational nature are permitted.
- 2. Development and site alteration is prohibited on lands within 120 metres of the Callander Bay PSW unless an Environmental Impact Study (EIS) is carried out by a qualified professional which evaluates the ecological function of the adjacent lands and demonstrates that there is no negative impact on the natural features or their ecological function.
- Development on and adjacent to the Callander Bay PSW may be subject to the requirements of the North Bay Mattawa Conservation Authority. Callander will consult with the North Bay Mattawa Conservation Authority on all such applications.
- 4. Should additional Provincially Significant Wetlands be identified in Callander they shall be incorporated into this Plan and Zoning By-law by way of amendment

7.1.2 Other Wetlands

Other wetlands include evaluated and un-evaluated wetlands that are at least 0.5 hectares in area and not part of another natural heritage feature or area or natural hazard as defined in this Plan. Wetlands provide many valuable environmental and economic functions as wildlife habitat, water filters and flood attenuation structures.

- Development and site alteration may be permitted in other wetlands subject to the requirements of the North Bay Mattawa Conservation Authority; including the submission of a wetland evaluation report.
- 2. Development and site alteration may be permitted within 30 metres of other wetlands subject to the requirements of the North Bay Mattawa Conservation Authority, including the submission of a wetland evaluation report.
- 3. Callander may scope or waive the requirement for a wetland evaluation, where:
 - a. a minor encroachment into the adjacent lands is proposed;

- b. significant 'intervening buffers' exist between the proposed development and the wetland and adjacent lands, such as roads or existing development; and,
- c. appropriate land use controls, such as Site Plan Control or Holding Provisions, can be utilized to ensure that development does not encroach into adjacent lands.
- d. Development and site alteration on, abutting and adjacent to surface water features may be subject to the requirements of the North Bay Mattawa Conservation Authority. Callander will consult with the North Bay Mattawa Conservation Authority on all such applications.

7.2 Significant Habitat of Endangered and Threatened Species

An endangered species is an organism that lives in the wild in Ontario but is facing imminent threat of extinction or extirpation. A threatened species is an organism that lives in the wild in Ontario, is not endangered, but is likely to become endangered if steps are not taken to address the factors threatening the species. A special concern species, lives in the wild in Ontario, is not endangered or threatened, but may become threatened or endangered due to a combination of biological characteristics and identified threats.

It is commonly accepted that habitat loss is one of two main reasons that a species is threatened by extinction. Preserving habitat is crucial to the survival of threatened or endangered species, as well as biodiversity and sustainability. Generally, the location of such habitat is not shown on land use schedules due to the sensitivity of the species.

Policies:

- 1. Development and site alteration is not permitted in the habitat of endangered and threatened species, except in accordance with provincial and federal requirements; and
- Callander will advise proponents of their obligations under the Endangered Species Act
 and that where any new endangered or threatened species occurrence is identified, any
 development or site alteration activities must immediately cease, and the Province of
 Ontario must be contacted.

7.3 Significant Wildlife Habitat

Significant wildlife habitat are those areas where plants, animals and other organisms live, and find adequate amounts of food, water, shelter, and space needed to sustain their populations. In Callander, significant wildlife habitat includes Deer Wintering Yards (Stratum 1), Late Winter Moose Habitat, Moose Aquatic Feeding Areas, Sticknests, Moose Calving Sites, Reptile Hibernaculum, Waterfowl Nesting Areas, and Amphibian Breeding Areas. These features may or may-not be shown on Schedule X insert title.

Policies:

 Development and site alteration is not permitted in areas of Significant Wildlife Habitat or within 120 metres of such habitat unless an EIS, including a wildlife habitat assessment, carried out by a qualified professional has demonstrated that there shall be no negative impact on the habitat or its ecological function. In the case of adjacent lands, the ecological function of the adjacent lands must also be evaluated. Recommendations of that report shall be implemented through a site-specific Zoning By-law Amendment and Site Plan Control to ensure that not negative impacts will occur.

7.4 Fish Habitat

Callander's lakes, rivers and other surface water features support a variety of recreational fisheries. These surface water features contain fish habitat, that is, spawning grounds and other areas including nursery, rearing, food supply and migration areas that fish depend on directly or indirectly to carry out their life processes. Wasi Falls is considered to be one of the main spawning locations for walleye in Lake Nipissing. Areas that are known or thought to be fish habitat areas are shown on Schedule X insert title.

Policies:

- 1. Development and site alteration in fish habitat is permitted in accordance with federal and provincial requirements.
- Development and site alteration on lands within 30 metres of fish habitat is permitted in accordance with federal and provincial requirements and where it has been demonstrated, through a fish habitat impact assessment prepared by a qualified professional, that there will be no negative impact on the habitat or its ecological function.
- 3. Development and site alteration on lands within 120 metres of Wasi Falls is permitted in accordance with federal and provincial requirements and where it has been demonstrated, through a fish habitat impact assessment prepared by a qualified professional, that there will be no negative impact on the habitat or its ecological function.
- 4. Callander and development proponents will consult with the Province of Ontario and Department of Fisheries and Oceans and North Bay Mattawa Conservation Authority prior to development or site alteration occurring on or adjacent to fish habitat.

Programs:

- 1. Callander will participate in future updates to the Lake Nipissing Fisheries Management Plan.
- Callander will work with its partners, including the Federal Government, Provincial Government, North Bay Mattawa Conservation Authority, neighbouring communities, including the Nipissing First Nation on activities to improve the Lake Nipissing fishery education, fish habitat mapping and inventory, restoration an indicator development and monitoring.
- 3. Callander will disseminate information to property owners on shoreline stewardship and etiquette.

7.5 Forests and Trees

Callander has an abundance of forests and trees contributing to the vast number of recreational opportunities for local residents and visitors to enjoy. These natural assets have natural climate solutions and provide a range of environmental, economic, social and health services.

- 1. New development shall be encouraged to maintain existing, healthy trees and plant new trees and other vegetation. Development proposals may be required to provide a Tree Retention Plan and Landscape Plan for review and consideration.
- 2. Existing developments shall be encouraged to maintain existing healthy trees and plant new trees and other vegetation, as appropriate.
- 3. Tree planting and other landscape restoration activities shall be encouraged on public lands.
- 4. Trees and other vegetation will be required in all future road upgrade and road construction projects, as appropriate.
- 5. Trees and other vegetation will be required in all future park upgrades and new park construction.
- 6. Preference is given to native species for any public or private development project. Where non-native species are proposed, they shall be non-invasive species. Further preference will be given to a diversity of species rather than a single species and species that are resilient to climate change and site specific considerations, such as salt tolerance.

Programs:

- 1. Callander may disseminate information to residents, businesses and other property owners regarding trees and the benefits associated with trees.
- 2. Callander may develop a list of preferred trees and other vegetation to be used in future public and private projects, including municipal linear infrastructure projects.
- 3. Callander may investigate the feasibility of creating a Tree By-law to regulate the injury and destruction of trees in all or parts of the community, as appropriate.

8.0 Cultural Heritage and Archaeology

8.1 Cultural Heritage Resources

Cultural heritage landscapes refer to a defined geographical area of heritage significance which has been modified by human activities and is valued by a community. Several individual heritage features such as structures, spaces, archaeological sites, and natural elements, together form a significant landscape, distinctive from that of its constituent elements or parts. Built heritage resources include significant buildings, structures, monuments, installations, or remains associated with architectural, cultural, social, political, economic, or military history, and identified as being important to a community.

Built heritage also falls under the realm of cultural heritage and is an important definition for land use planning. Built heritage is a building, structure, monument, installation or any manufactured or constructed part or remnant that contributes to a property's cultural heritage value or interest to a community. These buildings may have been deemed of having cultural heritage value under the *Ontario Heritage Act* or have been included on a local, provincial, federal and/or international register.

Callander has identified the Callander Bay Heritage Museum at 107 Lansdowne East as being of cultural heritage value or interest. Given its proximity to Corbeil, Callander is associated with the Dionne Quintuplets National Historic Event and would have seen the influx of visitors that arrived to the area after the birth of the "quints". Between 1934 and 1943, three million visitors

came to the area. Callander also hosts one Provincial commemorative plaque on Lake Nipissing.

Callander recognizes the importance of cultural heritage resources. The intent of these policies is to encourage the identification, conservation, restoration, and enhancement of these resources. Callander also supports awareness and participation with Indigenous communities, in particular Nipissing First Nation, and the public surrounding heritage resources.

- 1. The identification, conservation, restoration, and rehabilitation of all heritage resources be promoted.
- 2. All new development permitted by this Plan shall conserve significant cultural heritage resources and shall, wherever possible, incorporate these resources into any new development plans. In addition, all new development will be planned in a manner which preserves and enhances the context in which cultural heritage resources are situated.
- 3. Where development or site alteration is proposed on a property containing a designated heritage building or heritage conservation district (*Parts IV and V of the Ontario Heritage Act*), or on a property fronting on or directly abutting a property that is designated as a heritage building, a Heritage Impact Assessment (HIA) shall be required. The HIA shall be conducted by a qualified professional with expertise in cultural heritage resources to:
 - a. Identify the positive and adverse impacts on the heritage resource that may be expected to occur as a result of the proposed development;
 - b. Describe mitigation measures that may be required to prevent, minimize, or mitigate the adverse impacts; and
 - c. Demonstrate that the proposed development will not adversely impact the defined cultural heritage value of the property, and/or its streetscape/neighborhood.
- 4. In considering applications for waterfront development Council shall ensure that cultural heritage resources both on shore and in the water are not adversely affected. When necessary, Council will require satisfactory measures to mitigate any negative impacts on significant cultural heritage resources.
- 5. A HIA may be required when a proposed development appears to impact cultural heritage resources which are not designated but which have the potential for cultural heritage value or interest, including adjacent lands contiguous to a protected heritage property.
- 6. The Ontario Heritage Act may be utilized to conserve, protect, and enhance significant cultural heritage resources within Callander through the designation, by by-law, of individual properties, heritage conservation districts, and/or landscapes sites. The Municipal Council may also establish a Municipal Heritage Committee (MHC) pursuant to Section 28 of the Ontario Heritage Act to advise and assist on cultural heritage matters.
- 7. Applicants shall consult Indigenous communities where cultural heritage resources involve Indigenous heritage sites or burial grounds. The applicant shall seek the Indigenous advice on the manner in which these resources and features are to be dealt with
- 8. Callander may establish a Municipal Heritage Committee pursuant to Section 28 of the Ontario Heritage Act to advise and assist Council on matters related to Parts IV and V of the Act.

8.2 Archaeological Resources

Archaeological potential is determined through criteria established by the province. Such criteria includes known archaeological sites, proximity to water, current or ancient shorelines, cemeteries, sandy soils, rolling topography, unusual landforms, historic transportation features such as portage routes, places of past human settlement, or places significant to history and understanding of a people or place. Significant Indigenous and non-Indigenous cemeteries or unmarked burial sites may also be considered as archaeological resources.

Callander has identified archaeological potential in various locations throughout Callander. The areas have been home to indigenous peoples for thousands of years. Lake Nipissing had previously been used as a major transportation route between the Ottawa Valley and Georgian Bay used by Indigenous people and early European Settlers, as such high archaeological potential is present along the shoreline of Callander Bay, the Wasi River, other surface water features, landforms, historic trails and inland sites.

- 1. Where a development proposal or waterfront development or site alteration is located on lands with significant archaeological resources or is within an area considered to have archaeological potential, a licensed archaeologist, through archaeological fieldwork, shall determine which stages of assessment are required.
- A Phase I Archaeological Assessment in accordance with requirements of the Ministry of Heritage, Sport, Tourism and Culture Industries (MHSTCI) shall be required to determine the nature and extent of the resources on the site. The study shall be conducted by an archaeologist licensed under the *Ontario Heritage Act* and shall be submitted to Council and the MHSTCI prior to development approval.
- 3. Where resources are found on site, further investigations through a Phase II and potentially Phase III Archaeological Assessment may be required. The study may identify the need for archaeological preservation in situ or rescue excavation of significant archaeological resources as a result of development proposals. In situ preservation is preferred to ensure that the integrity of the resource is maintained. If the site is determined to be significant the development may be prohibited.
- 4. Any alterations to known archaeological sites shall only be performed by licensed archaeologists, as per Section 48 of the *Ontario Heritage Act*
- 5. In the event that human remains or cemeteries are encountered during site assessment or development, all work shall cease and the site shall be secured. The appropriate authorities shall be notified and the required provisions under the *Ontario Heritage Act* and the *Funeral, Burial and Cremation Services Act* shall be followed. All relevant Indigenous communities shall be consulted for input where any burial site or remains is considered to be of potential Indigenous origin. The applicant and/or Council shall seek the Indigenous advice on the manner in which these resources and features are to be dealt with. The Municipal Council may require that the development proponent retain archaeologists licensed under the *Ontario Heritage Act* to assess or monitor the site and recommend conservation strategies.
- 6. Callander shall consider the interests of First Nations and Indigenous communities in conserving cultural heritage and archaeological resources

8.2.1 Marine Heritage Resources

- A marine archaeological survey to be conducted by a licensed marine archaeologist pursuant to the *Ontario Heritage Act* may be required if partially or fully submerged marine features or items of cultural heritage value are identified and impacted by shoreline and waterfront developments.
- 2. Any marine archaeological resource that is identified must be reported to the MHSTCI immediately. MHSTCI shall determine whether the resource shall be left on location or may be removed, through excavation, by licensed marine archaeologists.

9.0 Protecting Health and Safety

Natural, physical and environmental processes can produce unexpected events that may result in damage to property, injury, loss of life, and changes to the natural environment. Natural hazards include events such as flooding, erosion, unstable bedrock, and slope failure. Human-made hazards also existing which result from human activities that modify or disrupt the landscape in a manner that threatens the health and safety of people and the environment.

The intent of this Plan is to minimize the risk to public health and safety and to property by restricting development within areas identified as being susceptible to natural and human-made hazards. This Plan is also intended to prevent further aggravation of existing hazard and to direct new development away from lands that are impacted by such hazards where there is an unacceptable risk to public health, safety or of property damage. The lands subject to natural and human-made hazards are shown as an overlay on Schedule X insert title.

9.1 Flood Hazards

There are two types of flood hazards: (1) those associated with Lake Nipissing, which is considered to be a large inland lake; and (2) those associated with other surface water features in the community.

- 1. All lands along the shore of Lake Nipissing below the 100 year floodplain elevation, excluding those areas where inflowing streams can cause greater flood depth are considered part of the Large Inland Lake Policy Area, as demonstrated on Schedule X insert title. All land uses are permitted within the Large Inland Lake Policy Area subject to adequate protection from flood, ice and wave damage. When deemed relevant by Callander, consideration shall be given to the effect of the proposed development on accretion or depletion of the shoreline and its impact on butting properties.
- 2. All proposed development, redevelopment and site alteration within the Large Inland Lake Policy Area shall be subject to the approval of the North Bay Mattawa Conservation Authority.
- 3. All land within the Large Inland Lake Policy Area is subject to Site Plan Control.
- 4. Development or redevelopment located within a flood plain are subject to the following:

- a. that floodproofing to the regulatory flood elevation as determined by the North Bay Mattawa Conservation Authority be undertaken, subject to the approval of the North Bay Mattawa Conservation Authority; and
- b. that the applicant enter a Site Plan Control Agreement with Callander regarding floodproofing, ice and wave protection, the site of structures, access, drainage, and the protection of shoreline vegetation.
- 5. The flood hazard overlay applies to land where preliminary identification of environmental constraints have been completed. Callander will require a more detailed assessment on a site by site basis to determine permitted land uses.

Program:

1. Callander will work with the North Bay Mattawa Conservation Authority to update flood and other natural hazard mapping within the community.

9.2 Erosion, Unstable Soils and Steep Slopes

Erosion, unstable soils, and steep slopes can cause the loss of land, such that the land may be unable to support structures, and therefore pose a threat to life and property. Development shall only be permitted where the effects of such hazards can be avoided or successfully mitigated.

While areas that are susceptible to erosion, unstable soils, and steep slopes have not been mapped, this issue should be considered at the time of development review and site assessment.

Policies:

- Land uses that are in conformity with the underlying land use designation may be permitted, subject to satisfying the policies of this Section, except for those uses that are explicitly prohibited. Existing buildings and structures shall be recognized as permitted uses
- 2. A geotechnical study shall be required for proposed development on sites with potential for erosion, unstable soils, or steep slopes. The study shall be completed by a qualified geotechnical engineer, consistent with criteria established in NDMNRF guidelines. For new development, the geotechnical study shall satisfy that the hazards can be avoided. In the case of existing development undergoing expansion or change of use, such study will determine how the hazard can be mitigated.
- 3. Development and site alteration on abutting and adjacent to hazard lands may be subject to the requirements of the North Bay Mattawa Conservation Authority. Callander will consult with the North Bay Mattawa Conservation Authority on all such applications.

9.3 Abandoned Pits and Quarries

Abandoned aggregate pits and quarries present a challenge as they pose a hazard to the public and environment and involves large parcels of land that are unproductive or incompatible with surrounding land uses. Rehabilitation is addressed in the *Aggregate Resource Act*. The intent of this Plan is to ensure that new development is adequately protected from these hazards.

- 1. Callander will encourage the rehabilitation of abandoned pits and quarries is encouraged.
- 2. Abandoned pits and quarries shall be rehabilitated prior to the approval of new development.
- 3. Development, redevelopment and site alteration on lands abutting or affected by an abandoned pit or quarry must be supported by study completed by a qualified individual that:
 - a. Identifies any potential safety hazard;
 - b. Demonstrates that the site can be rehabilitated to mitigated the known or suspected hazard;
 - c. Establishes procedures for site rehabilitation and mitigation of the safety hazard; or
 - d. Provides evidence that potential hazards do not exist on the site

9.4 Contaminated Lands

Contaminated sites are those lands where the environmental condition of the property has been harmed through past activities. While such lands represent a potential hazard due to real or potential environmental contamination, opportunities for brownfield redevelopment may exist. Brownfield sites represent opportunities for potential redevelopment and reintegration into the local community, if they are properly remediated to suit a new use of the site. Contaminated sites are not mapped as part of this plan.

Policies:

- 1. Prior to the development on a site that is known or suspected to be contaminated, a Phase I Environmental Site Assessment (ESA) will be required.
- 2. Where a Phase I ESA reveals that a site may be contaminated, a Record of Site Condition will be required prior to the issuance of building permit approval.
- 3. Management of excess soils shall be in accordance with O.Reg. 406/16 On-Site and Excess Soil Management.
- 4. All contaminated lands may be subject to Site Plan Control and/or holding provisions in the Zoning By-law.

Programs:

1. Callander may develop a Brownfield Community Improvement Plan to stimulate the revitalization of brownfield properties in the community.

9.5 Waste Disposal Assessment Areas

The Waste Disposal Assessment Area identifies where the existing or prior use of land for disposal of waste may an impact on future uses of these lands and possibly adjacent lands. These areas are shown on Schedule X insert title.

- 1. In areas identified as Waste Disposal Assessment Areas uses may be permitted by Callander in consultation with the Province and in accordance with the underlying land use designation, provided that:
 - a. Written approval has been received from the Province that the development satisfies the provisions of the *Environmental Protection Act*;
 - b. Studies have been carried out to the satisfaction of the Callander and the Province and in accordance with the policies of this Section of the Plan that show that the development is compatible and can safely take place;
 - c. Callander shall require the construction and phasing of all development to coincide with the control of any problems identified by the engineering studies;
 - d. Studies of gas, leachate and hydrogeology, shall be carried out by a qualified engineer and/or Hydrogeologist;
 - e. Callander shall be satisfied with the required studies with respect to any matter regarding structural stability, health, safety, and integrity of any and all structures; and
 - f. Notwithstanding the land use designations on the various Schedules to this Plan, residential development will not be allowed to proceed in areas identified by Sections b. and d. above, as containing organic or chemical wastes.
- 2. Only land uses compatible with potential impacts of waste disposal sites or their engineered controls will be permitted and may have to be determined by Amendment to the Zoning By-law as supported by the results of studies conducted under this Section.
- 3. Potentially contaminated lands and adjacent lands within 300 metres of a former waste disposal site may be zoned in a holding category as an interim measure until they are deemed suitable for development.
- 4. Development proposals within 500 metres of any open, closed, or inactive Waste Disposal Assessment Area will be accompanied by a study prepared by the proponent that meets the requirements of the Provincial Guideline D-4: Land Use on or Near Landfills and Dumps. The study will address any mitigation measures required.
- 5. New accessory buildings such as barns or private garages and renovations to existing residential buildings shall not be subject to the policies of this section.
- 6. An amendment to this Plan will be required for a new waste disposal assessment area.

9.6 Land Use Compatibility

Noise, vibration, odour, and other contaminants resulting from certain uses can impact adjacent land uses, and the residents, businesses, and visitors of Callander. Managing these adverse effects is important to ensuring the health and well-being of residents and the compatibility of neighbouring uses so as not to create conflicts.

- 1. In reviewing any development application, Council shall be satisfied that the proposed use will be, or can be made to be, compatible with surrounding uses in accordance with Provincial guidelines.
- 2. Influence areas and minimum separation distances between industrial land uses and sensitive land uses will be determined in accordance with Provincial Guideline D-6: Compatibility between Industrial Facilities and Sensitive Land Uses. Proponents may be required to provide supporting technical studies, prepared by qualified individuals in accordance with Provincial guidelines, to assist in the evaluation of proposed

- developments and, where applicable, to determine influence areas, address potential impacts, and identify appropriate separation distances and other mitigation measures.
- 3. In the absence of technical studies, prepared according to Provincial Guideline D-6 which identify an actual influence area, the minimum separation distances required between industrial uses and residential or other sensitive land uses shall be:
 - a. Class I Industries: 70 metres:
 - b. Class II Industries: 300 metres; and
 - c. Class III Industries: 1,000 metres
- 4. With the support of technical studies, prepared under Provincial Guideline D-6, the following minimum separation distances in accordance with Provincial guidelines shall apply between industrial uses and residential or other sensitive land uses:
 - a. Class I Industries: 20 metres:
 - b. Class II Industries: 70 metres: and
 - c. Class III Industries: 3000 metres
- 5. Separation distances between potentially conflicting land uses shall be measured in accordance with Provincial Guideline D-6.
- 6. Separation distances between sensitive land uses and sewage treatment facilities shall be measured in accordance with Provincial Guideline D-2.
- 7. Where residential or other sensitive land uses are proposed in proximity to aggregate operations or lands zoned to permit future aggregate operations, the standards for Class III Industries shall apply.
- 8. New land uses, including the creation of lots, and new or expanding livestock facilities shall comply with MDS Formulae, as amended from time to time.
- 9. Separation distances or appropriate remedial measures use will be established in the Zoning Bylaw or through development approval processes.
- 10. Residential areas, and other sensitive land uses, such as hospitals and nursing homes, will be protected from undesirable air quality and excessive noise/vibration through good land use planning, Site Plan Control, and building control. Proponents may be required to carry out noise and/or vibration assessments or other technical studies and determine control measures, which are satisfactory to Council, in meeting the Provincially recommended sound and vibration limits in accordance with Provincial Environmental Noise Guideline NPC-300 or its successors.
- 11. For any proposed residential development or other sensitive land use in close proximity to a major source of noise, vibration, or emissions, such as a provincial highway, an airport, a railway, or aggregate operation, or where a development which could be a major source of noise proposes to locate in close proximity to existing residential development or other sensitive land use, the proponent may be required to conduct a noise, vibration, and/or emissions study. The study shall be prepared in accordance with Provincial guidelines, including NPC-300, satisfactory to Council and the recommendations may be incorporated into a development agreement. Council will consider any potential noise problem in determining the appropriateness of the proposed development.
- 12. Uses proposed within these buffer areas may be subject to noise feasibility and/or detailed noise studies in accordance with NPC-300 or its successors.

9.7 Wildland Fire

Wildland fire hazard and associated risks are created when human activity and development intersect with forested areas. NDMNRF has reviewed and classified hazardous forest types for wildland fire that are associated with the risk of high to extreme wildland fire.

- Development shall generally be directed to areas outside of lands that are unsafe for development due to the presence of hazardous forest types for wildland fire. Development may be permitted in lands with hazardous forest types for wildland fire where the risk is mitigated in accordance with wildland fire assessment and mitigation standards, as identified by NDMNRF.
- 2. In the absence of detailed municipal assessments, proponents submitting a planning application may be required to undertake a site review to assess for the presence of areas of high to extreme risk for wildland fire on the subject lands and adjacent lands (to the extent possible). If development is proceeding where high to extreme risk for wildland fire is present, measures should be identified by proponents to outline how the risk will be mitigated.
- 3. Lands determined to be of high to extreme risk for wildland fire may be designated as Site Plan Control areas.
- 4. Wildland fire mitigation measures which would result in development or site alteration shall not be permitted in significant wildlife habitat unless it has been demonstrated that there will be no negative impacts on the natural features or their ecological functions, or in the habitat of endangered and threatened species except in accordance with provincial and federal requirements.

9.8 Unidentified Hazards

In some circumstances, the scope or extent of a hazard may not be known. Where a proposal is on or near lands that include a suspected hazard or if the extent of a known hazard has not been confirmed, Callander must be satisfied that the proposed development will not be affected. The development proposal should be designed to avoid the hazard or engineered to withstand the hazard where permitted. Callander may require supporting technical studies prepared by a qualified individual to determine the extent of the hazard and appropriate mitigation measures.

10.0 Mobility

Mobility matters. The design of the active transportation and transportation networks influences the choices that people make to get to and around Callander, be it to go to work, shop, or a favourite recreational activity. The connection between mobility planning and land use planning is paramount. Land use and mobility planning must be integrated to ensure that Callander's strategic economic, environmental and population health outcomes are realized. Callander plays an important role to ensure a sustainable and integrated transportation network. The intent of this Plan is to provide the broad framework necessary to achieve a sustainable and integrated transportation network.

10.1 Active Transportation

Callander's active transportation network consists of various sidewalks, paved shoulders, the Trans Canada Trail, including Kate Pace Way, Cranberry Trail and informal bicycle routes such as the Corbeil Circle and Powassan Circle Routes. Callander completed an Active Transportation Plan in 2013 to establish an active transportation vision for the community and recommend various active transportation improvements. Existing active transportation infrastructure and proposed active transportation improvements are shown on Schedule X insert title.

Policies:

- 1. The existing active transportation network will be maintained and expanded in accordance with the Active Transportation Plan and this Plan.
- 2. Development proposals will be reviewed to ensure that there is adequate pedestrian and bicycle facilities in new developments. Callander may acquire lands to provide active transportation facilities as a condition of approval. Bicycle parking facility development standards will be defined in the Zoning By-law.
- 3. New active transportation infrastructure will be designed to be safe, accessible and enjoyable.

Programs:

- Callander will work with the Province of Ontario to encourage a paved on-road dedicated bicycle facility or multi-use pathway from Highway 11 to the municipal boundary west of Tillicum Road.
- 2. Callander will work with its partners to promote regional cycling between Callander, East Ferris, North Bay and Nipissing Village.
- 3. Callander will develop pedestrian connections between ST. Theresa Elementary School and the community, as appropriate.
- 4. Callander will develop pedestrian facilities on King Street and Swale Street and complete missing pedestrian facilities on High Street.
- 5. Callander will support pedestrian safety on streets with paved shoulders such as Osprey Links, Pleasantview Place and Woodlands Drive.
- 6. Callander will extend the paved surface from the end of Kate Pace Way to Fairway Drive.
- 7. Callander will develop a dedicated cycling lane on Main Street.
- 8. Callander will install new bicycle parking racks at the intersection of Main and Lansdowne, parks and beaches, government dock, community centres, and municipal hall and Memory Tree Park.

10.2 Roads

Callander's road network consists of provincial highways, arterial roads, collector roads, local roads and private roads. The intent of the Roads policies is to protect and enhance the road network to ensure that it meets the needs of current and future residents. The existing road network and road network hierarchy is shown on Schedule X insert title.

- 1. All development adjacent to and within the permit control areas established by the Province of Ontario for Highways 11, 94 and 654 will require provincial approval. Callander will consult with the Province of Ontario for all such development applications. Highway 11 is a controlled access highway. New access to Highway 11 is not permitted.
- 2. Arterial roads are designed to connect Callander to other centres and facilitate the movement of people, goods and services. New access to arterial roads is restricted and may be permitted if there is not reasonable alternate access to an existing lot of record. The planned right of way for arterial roads is 30 metres.
- 3. Collector roads are designed to connect neighborhoods or connect neighborhoods to arterial roads. New access to collector roads is permitted and shall be minimized. The planned right of way for collector roads is 24 metres.
- 4. Local roads are designed to connect properties within a neighborhood. New access to local roads is permitted. New local roads will be developed through the Plan of Subdivision approval process. The planned right of way for local roads is 20 metres.
- 5. All new lots will front onto public roads that are maintained year round.
- 6. Private roads are designed to connect properties to existing publicly owned and maintained roads. Callander does not intend to assume control (ownership and maintenance) for private roads. Callander may assume control if the proponent has upgraded the road to municipal standards.

Programs:

1. Callander will develop a policy and procedure to guide the submission, evaluation and decision making on any future requests to assume control over public roads.

10.3 Parking

The supply and cost of parking play a key role in the operation of the transportation network. These factors also influence the individual choices regarding how to get to work or shop. Parking policies may even impact preferences as to where we live, an important consideration in the promotion of residential uses in the Downtown.

Parking includes metered and unmetered spaces, private off-street lots and public off-street lots.

Policies:

- New developments generally must provide an adequate supply of parking to meet anticipated demands. Parking development standards will be defined in the Zoning Bylaw.
- Parking standards for land uses and areas within Callander may be reduced if demonstrated through a study undertaken for such purpose.
- 3. Opportunities to reduce parking standards for development and intensification supported by a Transportation Demand Management Strategy.

Programs:

Callander may undertake a study to examine the feasibility of reducing parking standards for land uses (e.g. commercial) or areas of the community (e.g. Downtown and Waterfront).

10.4 Water

Like many communities along Lake Nipissing, Callander has a long history of water based transportation for commercial, recreational and non-recreational purposes. The intent of this Plan is to recognize water based transportation as a viable mode of transportation in the community. Callander will explore the feasibility of upgrading municipal infrastructure, including the marina, to support current and future water based transportation needs, including those of Island Area residents and cottagers.

10.5 Lakeshore and Road Allowance

Lakeshore and road allowances are lands originally laid out by a Crown Surveyor, including both road allowances shown on an original township survey and those shown along the water.

- 1. Callander will not stop up or sell unmaintained road allowances where there is any possibility that there is a potential future public use for the lands. Road allowances leading to water will not be sold to abutting property owners unless alternate public access is available in the immediate area.
- 2. Where road allowances along the shores of lakes or rivers have been laid out in locations where they are not required for pedestrian or vehicular traffic or to protect public access or natural resource values, it shall be the general policy of this Plan to permit such road allowances to be stopped up and sold to the abutting land owners in accordance with the *Municipal Act*. The proceeds of such sales shall be used to fund the acquisition of land or facilities for public recreation purposes.
- 3. In its assessment of applications for the closure and sale of public road allowances along shorelines, Council shall have regard to the following:
 - a. Road allowances, or portions of an allowance, that are or will be used for public waterfront recreational use, public access, emergency access, public travel and portage or other municipal purposes shall be reserved. Further, no approval shall be given to closing any road allowance that leads to water.
 - b. Road allowances or portions of an allowance that contain, abut or provide access to important fish spawning areas, wildlife habitat or other environmentally sensitive features or portions on which significant historical or cultural features have been identified shall be reserved.
 - c. Road allowances, or portions of an allowance, may be closed and sold to abutting land owners only after Council, on an individual basis, has reviewed the concerns of adjacent and area landowners, other approval agencies such as the Province and/or the North Bay-Mattawa Conservation Authority. Ontario Hydro and Bell Canada with respect to the extent and the shape of the portions to be closed
- 4. Only the portion of the road allowance above the natural or regulated highwater mark may be sold.
- 5. Lands that are subject to flooding or other hazards may be sold. However, any excavation, or construction or the placement of fill on these lands will be subject to the approval of the Province and/or the North Bay-Mattawa Conservation Authority.
- 6. It shall be the policy of council to protect lake and riparian ecosystems by encouraging the retention of shoreline areas in as natural a state as possible. In this regard, an appropriate setback will be established in the Zoning By-law to restrict the placement of

- buildings and structures within the shoreline area. Additions, reconstruction and the alterations to legally existing buildings generally will be permitted provided such changes do not further encroach into the water yard setback. In addition, subdivision agreements and site plan control agreements will be utilized to further minimize impacts.
- 7. All costs incurred in the closing and sale of a lakeshore road allowance shall be paid for by the respective landowner who shall be subject to any additional fees or requirements that may be determined by Callander.

11.0 Infrastructure and Utilities

Callander of Callander contains a range of infrastructure to support daily life. This includes a municipal drinking water system, municipal sewage system, stormwater management facilities and waste management.

Providing and maintaining civic infrastructure and services is an important responsibility of Callander and contributes to the well-being of the community. It is the intent of this Plan to ensure that municipal services are adequate and able to effectively service existing and proposed development. The design and provision of most civic infrastructure and core services are guided by provincial policies, regulations and guidelines.

Policies with respect to transportation infrastructure is provided in Section 10.0 Mobility of this Plan. In addition, 'soft' infrastructure that contribute to the high quality of life of Callander residents such as parks and recreational facilities, is provided in Sections 2.6 'Open Space and Parkland' (Settlement Area), Section 3.5 'Open Space and Parkland' (Rural Area) and Section 8.0 'Cultural Heritage and Archaeology'.

11.1 Water and Sewer

Callander of Callander is tasked with the sole responsibility for the supply and distribution of water and sewage disposal services within Callander. Municipal water and sewage disposal services are provided to the Settlement Area of Callander, while the rural area is primary serviced by individual wells and individual on-site septic systems.

- 1. All development within the Settlement Area shall be serviced by public water and sewage disposal services;
- Development supported by communal water supply or communal sewage disposal systems shall not be permitted within the Settlement Area without an Official Plan Amendment
- 3. All development outside of the Settlement Area shall be serviced by private on-site water and sewage services:
 - 1. for sewage systems designed to treat more than 10,000 litres of effluent per day, approvals are required from the Province of Ontario
 - 2. for sewage systems designed to treat less than 10,000 litres of effluent per day, approvals are required from North Bay Mattawa Conservation Authority.

- 4. Development in the Rural area shall demonstrate, to the satisfaction of Council, that is satisfied that the development will not have adverse impacts on neighboring wells or sewage disposal systems and on surface and groundwater quality.
- 5. Development supported by communal water or sewage treatment within the Rural Area will required an Amendment to this Plan, and a financial impact analysis for the services and an agreement with securities to ensure that the services do not create potential liability to Callander.
- Callander shall optimize the use of existing infrastructure and consider opportunities for adaptive reuse of old infrastructure such as water main lining, prior to replacing infrastructure with new infrastructure;
- 7. All new sewage disposal systems should utilize new technology in sewage disposal systems and be developed in a manner that reduces nitrate and phosphate in the effluent and hence the impact on adjacent waterbodies.
- 8. The extension of municipal water or sewage disposal services to development outside of the Settlement Area will be considered on a case-by-case basis, where such extensions are necessary to address failed on-site septic and water service. The following criteria shall also be considered:
 - 1. Alternative sources of water supply are not available or adequate;
 - 2. A health hazard exists; and/or
 - 3. Environmental degradation is occurring
- The extent of municipal services provided outside of the Callander Settlement Area shall
 not be expanded unless it can be demonstrated to the satisfaction of Council that the
 additional servicing costs will be of-set by increased assessment or other benefits to
 Callander.
- 10. Extensions and expansions to municipal services to accommodate new development shall be done at the cost of the developer. Where services are oversized to accommodate future development, Callander may enter into an agreement with the developer to assist in the recovery of additional costs incurred as the result of oversizing services.
- 11. Development of new sensitive uses within a minimum of 150 m from the Callander Sewage Treatment Plant are subject to the policies of Section 9.6 Land Use Compatibility.
- 12. Upgrading or replacement of infrastructure in need of improvement will be conducted as required and generally in accordance with Callander's Asset Management Plan as appropriate;
- 13. Allocation of sanitary sewage treatment capacity shall occur upon draft approval of a development of Plan of Subdivision or through the rezoning of a single site for multiple residential, commercial or industrial uses only after subdivision, condominium or site plan agreements have been completed and the necessary securities have been put into place. Council may impose a limit on the amount of time that allocation of sewage capacity can be held before a building permit is issued.

Programs:

- 1. Callander will continue to monitor and undertake appropriate actions to improve the efficiency of the sewage lagoons.
- 2. Callander will prepare a Water/Wastewater Master Plan

11.2 Development Staging

- 1. Schedule X insert title outlines a development staging plan for the Callander Settlement Area. The Stage 1 development areas may develop on the basis of the availability of the capacity of the sewage lagoon, as it existed on the date of the adoption of this Plan.
- 2. Development within the Stage 2 development area is contingent on expansion of the sewage lagoon and confirmation of water services being available. Draft plan approval for developments within the Stage 2 areas shall only be considered following the completion of the Environmental Assessment for the expansion of the sewage lagoon. As a condition of draft plan approval within the Stage 2 area, final approval shall not be given until the tender for the sewage treatment facility construction has been awarded.

11.3 Stormwater Management

Stormwater management assists in protecting and improving water quality. It controls the quantity of stormwater runoff to reduce erosion and flooding and improve the quality of stormwater runoff.

Stormwater management includes water resulting from storm events or a thaw. Understanding that land use activities directly and indirectly impact stormwater management, such as impervious surfaces (i.e. roads, driveways, rooftops) which prevent infiltration and can lead to forced flow overland, increased flood risk, pollution and erosion, it is important to have adequate stormwater management measures in place.

The intent of the stormwater management policies is to ensure that consideration is given to stormwater management, the quality and quantity of stormwater runoff, and off-site impacts for proposed development. Further, naturalized stormwater management practices to help reduce capital and maintenance costs and to support sustainable practices are encouraged by this plan.

- 1. All commercial, industrial, institutional, recreational and multiple residential development proposals shall be supported by Stormwater Management (SWM) reports. The content and scope of the report shall be determined when the development is proposed.
- 2. New development shall consider the impacts of stormwater on the quality and quantity on the lands and waters downstream. Stormwater Management Plans shall be required as a condition of development approval within the Callander Settlement Area and for any large scale development, or Plan of Subdivision within Callander.
- 3. Municipal Council requires that all detailed stormwater design plans be completed in accordance with the guidelines of the current MECP Stormwater Planning and Design Manual for all commercial, industrial, and institutional development, and multiple residential development. Council may recommend additional specific requirements on a case-by-case basis. Council will protect all waterbodies within Callander.
- 4. Stormwater management plans for development adjacent to and in the vicinity of a provincial of a provincial highway must be prepared in accordance with Ontario Ministry of Transportation (MTO) guidelines and must be reviewed and approved by MTO.
- 5. The plan will include identification of the receiving waterbody, design objectives to be applied, and a description of the stormwater management practices to be applied, in

- accordance with the relevant Provincial policies and guidelines. Proponents are encouraged to consult with the relevant ministries and agencies.
- 6. Increases in runoff from development shall be minimized in accordance with best management practices and watershed needs. The impact of any proposed development on local and area-wide drainage patterns shall be identified. An appropriate method of managing surface runoff shall be developed and implemented as a condition of approval, according to the following policies:
 - a. Post-development flow rates shall not exceed pre-development flows;
 - b. Plans shall minimize or prevent increases in contaminant loads;
 - c. Retention of existing tree cover and natural vegetation or the provision of grassed and natural areas shall be encourages to facilitate absorption;
 - d. Erosion and siltation control measures shall be included in grading and drainage plans;
 - e. Development which could have a significant impact on surface drainage shall provide comprehensive drainage plans showing methods of surface water disposal and any impacts on adjacent or affected properties;
 - f. Low Impact Development (LID) alternatives, to manage stormwater as close to its source as possible, will be encourages, especially for larger scale developments;
 - g. Use of best management practices; and
 - h. Other matters as determined by Callander

Programs:

- 1. Callander will implement a municipal wide storm water management approach which will include, but is not limited to:
 - a. Education about stormwater management;
 - b. Implementing a point source monitoring plan to monitor specific sources of pollution;
 - c. Improved snow disposal sites
- 2. Callander will monitor existing publicly and privately owned stormwater management systems, through the development of minimum inspection and maintenance standards.
- 3. Callander will undertake a stormwater management master plan for the Settlement Area in conjunction with its partners such as the North Bay Mattawa Conservation Authority and Ministry of Environment, Conservation and Parks.

11.4 Waste Management

Waste management refers to sites and facilities to accommodate solid waste and includes recycling facilities, transfer stations, processing sites and disposal sites (such as landfills and incinerators). Solid waste disposal is provided by the City of North Bay

Policies:

 Strive to facilitate waste diversion from the landfill through the development, support and where feasible expansion of waste diversion initiatives such as additional plastics recycling, and organics composting; and 2. Consider the implications of development and land use patterns on waste generation, management and diversion

Program:

1. Callander will work to develop partnerships to aid in investigating methods to decrease waste production and increase waste diversion efforts.

11.5 Utilities

There are public and private sector entities that are responsible for the delivery, regulation and maintenance of energy and communication services including oil and gas lines, and communication systems. It is the responsibility of these organizations to comply with regulatory framework established by the government.

Policies:

- 1. Proactively work with outside agencies and stakeholders to appropriately plan for and support telecommunications infrastructure development;
- 2. Protect existing utility corridors through appropriate land use and development controls;
- 3. Discourage the placement of utilities within 100 m of a waterbody, or natural heritage feature.
- 4. Review applications for the construction of new utilities and encourage that they be installed in an efficient and economical manner with minimal disruption to the existing development and natural environment.
- 5. The National Energy Board shall be consulted by Callander on any development proposed within 200 metres of the TransCanada pipeline(s) Any development within 30 metres of the right-of-way of the TransCanada pipelines which involves excavation, blasting and any movement of heavy equipment is regulated by and subject to the approval of the National Energy Board.
- 6. A minimum 7 metre setback shall be maintained from the TransCanada pipeline(s) right-of-way. A reduction will only be considered where it can be demonstrated, to the satisfaction of TransCanada, that it will not compromise the safety and integrity of the pipeline.
- 7. Telecommunications infrastructure is regulated by Innovation, Science and Economic Development Canada (ISED). While Telecommunications towers are exempt from municipal zoning by-laws, there is a public consultation protocol and proponents are required to obtain a "letter of concurrence" from Callander, which is then submitted to ISED to indicate Callander's support of the installation of the new telecommunications tower.

12.0 Implementation

An Official Plan is a key, long-term strategic document that will guide growth, development and change throughout Callander over the next 20-25 years. It is anticipated that the Official Plan will be used to inform other strategic plans, master plans and other planning programs developed by Callander and its partners during the life of the Official Plan. It is also anticipated that the Official Plan will inform other initiatives list asset management planning, infrastructure capital planning, financial planning and the annual budget process.

This section establishes policies pertaining to the administration and implementation of this Official Plan in the land use planning context, using the appropriate legal and financial tools. Generally, the Official Plan will be implemented by Callander through the use of specific authorities defined in the Planning Act, general authorities pursuant to the Municipal Act and any other relevant provincial and/or municipal legislation.

The policies of this Plan balance local and provincial goals and objectives in land use planning. The Plan has regard to matters of provincial interest in the Planning Act, is consistent with the Provincial Policy Statement 2020 and conforms/does not conflict with the Growth Plan for Northern Ontario. In addition to the policies of this Plan, there are other plans, policies, programs, legislation, regulations and guidelines established by various Provincial Ministries that must be considered when applications for new development are proposed. All applications will be reviewed against the policies of this Plan, with necessary regard to this broader legislative framework. This chapter discusses the planning tools available to Callander, the role of public participation, the importance of ongoing monitoring and how to interpret the Plan.

12.1 Official Plan Implementation

- 1. Implement the objectives, policies and programs contained in this Plan by using:
 - a. public means of implementation such as land acquisition, public works, finance and other government programs;
 - b. regulation of private development through tools such as subdivision control, zoning, building regulations, and other by-laws; and,
 - c. the preparation of more detailed plans.
- 2. Use all legislative powers vested in Callander through provincial statues having effect in Callander in implementing this Plan.
- 3. Undertake no public work or pass any by-law for any purpose that does not conform with this Plan.
- 4. Ensure that public works to be undertaken by Provincial and Federal Ministries and other public agencies conform with the policies of this Plan.
- 5. Investigate new or improve techniques of implementation and make use of those that are shown to facilitate the achievement of Callander's goals and objectives.

12.2 Official Plan Amendment

This Plan shall be reviewed and amended from time to time as required by Council to meet the changing needs of the citizens of Callander and to respond to new issues, information and projects. Amendments may be initiated by Municipal Council or by citizens. Amendments must follow the procedures outlined in this Plan and the *Planning Act* and its regulations.

As per Section 22 of the *Planning Act*, upon final Provincial approval of the new Official Plan, there is a '2-year time out period' whereby no person or public entity can file an Official Plan Amendment application. The *Planning Act* provides that Callander may waive the 2-year time out period requirement.

Policies:

1. To waive the 2-year 'time out' period established in Section 22 of the *Planning Act* and thus permit Official Plan Amendment applications to be brought to Council at any time;

- 2. That any provision of this Plan may be amended pursuant to the requirements of the *Planning Act*;
- 3. That when considering an application to amend the Official Plan, Callander shall consider the following matters:
 - a. The conformity of the proposal to the principles, strategic direction, objectives, and appropriate policies of Callander Official Plan;
 - b. Matters of provincial interest in the *Planning Act*;
 - c. Consistency with the Provincial Policy Statement, 2020;
 - d. Conformity with the Growth Plan for Northern Ontario;
 - e. Other relevant legal, policy or regulatory requirements;
 - f. The views of the public, public bodies and other stakeholders;
 - g. Whether the proposed amendment is in the public interest; and,
 - h. Other matters as deemed appropriate.
- 4. That Callander shall provide information regarding a proposed amendment to the Official Plan to such boards, commissions or agencies that may have an interest in it. Prior to adopting a proposed amendment, Callander shall afford such agencies an opportunity to submit comments;
- 5. That prior to adopting an amendment to the Plan, Callander shall provide information and hold a public meeting for the purposes of obtaining public input concerning the proposal, subject to the provisions of the *Planning Act*, and Section 12.8.3 of this Plan;
- 6. That prior to Callander considering an application to amend the Official Plan, the applicant shall meet the requirements of Sections 12.8.2 of this Plan.

12.3 Committee of Adjustment

Pursuant to Section 44 of the *Planning Act*, Council has delegated to the Committee of Adjustment the ability to grant consents, minor variances, and extension to legal non-conforming uses. Operating procedures of the Committee of Adjustment are governed by the provisions of Section 45 of the *Planning Act*. The Committee shall be guided by the provisions of the *Planning Act* and by the policies of this Plan when deliberating on applications.

12.3.1 Consents to Sever

The Committee of Adjustment can grant consents to sever the land for ownership, rights in use of land (easements) by sale, purchase or mortgage, lease or other form of agreement for a period of twenty-one years or more.

12.3.2 Minor Variances

The Committee of Adjustment in considering a Minor Variance Application shall assess if the requested variance(s) satisfies the four tests of a Minor Variance:

- 1. Does it maintain the general intent of the Official Plan?
- 2. Does it maintain the general intent of the Zoning By-law?
- 3. Is it desirable for appropriate use and development of the land?
- 4. Is it minor?

12.3.3 Non-Conforming Uses

An existing use which is not permitted by the provisions and policies of the applicable Zoning By-law is "legal non-conforming". Applicants for the extension or enlargement of a non-conforming use will be considered by the Committee of Adjustment. The Committee of Adjustment in considering an application for enlargement or extension of a legal non-conforming use shall consider the following:

- 1. The proposed extension or enlargement will improve or not unduly aggravate the situation created by the existence of the use;
- 2. The proposed extension or enlargement represents a reasonable increase in the size of the non-conforming use;
- 3. The characteristics of the existing non-conforming use and the proposed extension or enlargement will be examined with regard to impacts from noise, vibration, fumes, smoke, dust, odour, lighting, and traffic generation;
- 4. The host neighbourhood and adjacent uses will be afforded reasonable protection by the provision of landscaping, buffering or screening; appropriate setbacks for buildings and structures; and devices and measures for reducing nuisances:
- 5. Adequate provisions will be made for off-street parking and loading facilities;
- 6. All municipal services such as water, sewage and roads are and will continue to be adequate, and,
- 7. The application is referred to municipal departments and other appropriate agencies which may be concerned or affected for information reports on relevant considerations before making a decision.

Notwithstanding the above, the Committee of Adjustment shall not approve the enlargement or extension of a legal non-conforming use that would allow the legal non-conforming use to extend beyond the boundaries of the property on which the legal non-conforming use first existed. For the purposes of clarity, any legal non-conforming use that extends beyond the boundaries of the property on which the legal non-conforming use first existed will be considered as an illegal land use.

12.4 Land Use and Development Design Controls

12.4.1 Zoning By-law

Zoning is the regulation of land use and structures intended to promote the public health, safety, comfort, convenience and general welfare of residents.

1. Callander will update the Zoning By-law within three (3) years of the New Official Plan coming into effect, and after completing each comprehensive review of the Official Plan so that it conforms to the most current version of the Official Plan:

- 2. Callander will ensure that Zoning By-law and amendments thereto conform to the policies of this Plan;
- 3. Callander will evaluate each rezoning application according to all applicable policies of this Plan;
- 4. Callander may pass an amending By-law with an advisement to the Owner(s) that if no development has been initiated within three (3) years of the By-law amendment coming into effect, Callander may initiate the process to restore the original zoning on the lands unless a Site Plan is entered is entered into, establishing firm deadlines for completion;
- 5. Callander will consider applications for Minor Variances to the Zoning By-law pursuant to the policies of Section 12.8 of this Plan.

12.4.2 Holding Provision

A Zoning By-law may contain Holding provisions when the use of land has been determined, but conditions have been identified by Council that need to be satisfied prior to the development proceeding. Lands subject to these provisions shall be identified by the holding symbol "H" following the zone symbol on the zoning consolidation schedules.

- 1. The holding symbol (H) is generally used in the following instances:
 - a. When certain details of development have not yet been determined, or where certain conditions of development have not yet been met such as, but not limited to, development or servicing agreements with Callander;
 - b. When the level of community services and/or infrastructure is not yet adequate to support the proposed use;
 - c. Where environmental conditions or constraints temporarily preclude development or redevelopment;
 - d. Where soil remediation is required prior to development;
 - e. Where required studies have not yet been approved by Callander; and
 - f. Where necessary approvals from applicable licensing agency having jurisdiction are pending.
- 2. The zoning by-law containing the holding provisions may specify the interim land uses to be permitted, the conditions of removal of the holding provision, and any regulations or restrictions applying to the lands during the time the holding provisions is in place; and
- 3. A by-law to remove the holding symbol may be adopted when all the conditions set out in the holding provision have been satisfied.

12.4.3 Interim Control By-law

Callander may enact an Interim Control By-law for a period not exceeding a total of two years from the date of the initial passing of the Interim Control By-law, to prohibit certain land uses or development patterns until such time that Council has had time to conduct a full review or study and develop policies and regulations for such uses or development patterns. Once an Interim Control By-law ceases to be in effect, Council may not pass another Interim Control By-law

that applies to the same lands as the original Interim Control By-law for a period of three years.

12.4.4 Temporary Use By-law

Council may authorize, by by-law, a temporary use of land for a purpose that is otherwise prohibited by this Official Plan and the Zoning By-law, for a period not exceeding three years. Prior to the passing of a Temporary Use By-law, Council shall be satisfied that the proposed temporary use meets the following criteria:

- 1. That it is in the public interest;
- 2. That it is compatible with neighboring land use activities:
- 3. That adequate parking can be provided;
- 4. That an adverse impact on traffic will not be created;
- 5. That the construction of a permanent building or structure is not encouraged;
- 6. That the use cannot become permanent and difficult to terminate; and
- 7. That adverse environmental impacts will be avoided, minimized or mitigated.

12.4.5 Site Plan Control

The entirety of Callander is designated for Site Plan Control pursuant to the *Planning Act*, and local Councils may specify types of development and/or exceptions in the Site Plan Control By-law. Notwithstanding, Council may impose Site Plan Control on exempted properties during the development application review process where warranted.

- 1. Any required site plan agreement shall deal with the following, as appropriate:
 - a. Road widenings;
 - b. Location of vehicular access points;
 - c. Loading, parking and driveway locations;
 - d. The surfacing of loading, parking and driveway areas;
 - e. The location and design of walkways and walkway ramps;
 - f. The location, massing and conceptual design of any buildings and structures;
 - g. The character, scale, appearance, design and sustainable design features:
 - h. The location and type of lighting, landscaping;
 - i. Preservation of natural vegetation to act as vegetative buffers to protect water quality and other environmental features;
 - j. The location and type of garbage storage;
 - k. The location and type of accessibility ramps;
 - I. The location and nature of easements;
 - m. The grade and elevation of the land;
 - n. The type and location of storm, surface and wastewater disposal facilities;
 - o. The location and type of snow removal facilities; and

- p. Other matters as may be required to implement this Plan
- 2. Where a Site Plan Control By-law is in effect, the proponent will submit for approval such plans or drawings as required by Council. The proponent may also be required to enter into an agreement with Callander to provide and maintain those facilities required on the site plan. Such agreements may be registered against the land to which it applies.
- 3. The following uses should be subject to Site Plan Control:
 - a. Mobile home parks;
 - b. Wayside pits and quarries, portable asphalt plans, and portable concrete plants;
 - c. Multi-residential development;
 - d. Local Commercial uses:
 - e. Downtown designation;
 - f. Employment designation;
 - g. Gateway Mixed-Use Area Designation;
 - h. Rural commercial, institutional and industrial uses;
 - i. Outdoor recreation uses:
 - j. Shoreline Area designation;
 - k. Island Area designation;
 - I. Mineral and Mineral Aggregate Area;
 - m. Lands that have high to extreme risk for wildland fire;
 - n. Contaminated sites

12.4.6 Legal Non-Conforming and Non-Complying Uses

Many existing land uses may not conform with the designations and/or policies of this Plan. These uses are generally viewed as undesirable, and the intent is the use should eventually cease and the property will be developed with a new use that is compatible with this Plan. With respect to these non-conforming uses, the following policies will apply:

- 1. Nothing in this Plan will affect the continuance of uses legally existing on the date this Plan was adopted;
- 2. The Council may recognize in the implementing Zoning By-law existing uses of land buildings or structures, that are not in conformity with the land use designation of this Plan. When determining the suitability of any existing use for consideration in this manner, Council shall have regard to the policies of this Plan.

12.4.6.1 Non-Conforming Uses

Any legally existing use that does not conform to the relevant policies contained in this Plan will be deemed legal non-conforming in terms of this Plan. The following shall apply:

1. Where an existing non-conforming use is discontinued, any rezoning may only take place in conformity with this Plan;

- 2. If the use is similar or compatible with the uses permitted in the Zoning By-law, it may be permitted to expand or redevelop, subject to any conditions the Committee of Adjustment deems appropriate as per the provisions of Section 12.3 of this Plan; and.
- 3. An existing building or structure that is zoned as a nonconforming use may be reconstructed or strengthened to a safe condition, provided the external dimensions and use of the building or structure are generally not change.

12.4.6.2 Non-Complying Use

Where a legally existing use of land is permitted within the applicable zone int eh Zoning By-law, but the lot, buildings or structures located on the property no longer meet one or more of the provisions or regulations of the applicable zone, due to changes to the Zoning By-law, the use shall be considered to be legal non-complying.

 Applications for the expansion, alteration, or addition of the noncomplying use will be considered by way of a Zoning By-law amendment or minor variance, depending on the nature of the proposal.

12.5 Land Division Tools

12.5.1 Severance

A consent to sever shall only be considered where a plan of subdivision is deemed to be unnecessary, where the application conforms with the policies of this Plan, is consistent with the Provincial Policy Statement, conforms/does not conflict with the Growth Plan for Northern Ontario and does not necessitate the creation of a new municipal road, or the extension of municipal services. Additionally, following policies shall apply:

- 1. residential lot creation in rural areas is limited to the creation of two new lots, plus the remnant or retained parcel, counted from Month Year;
- 2. when assessing an application to create a new lot by Consent to sever, Callander shall be satisfied that:
 - a. front(s) on and will be directly accessed by a public road that is maintained on a year-round basis;
 - b. not cause a traffic hazard as a result of its location on a curve or a hill;
 - be serviced with an appropriate water supply and means of sewage disposal; the proposed use of the severed parcel(s) is compatible with the abutting land uses;
 - d. not have a negative impact on the drainage patterns in the area;
 - e. not have a negative impact on the water quality of the adjacent waterbody/watercourse;

- f. not restrict the development of the retained lands or other parcels of land, particularly as it relates to the provision of access, if they are designated for development by this Plan;
- g. not have a negative impact on the features and functions of any natural heritage feature in the area;
- h. where on full municipal services, be accommodated in the uncommitted servicing capacity or where on private sewage systems there is sufficient disposal capacity for pumped septage and written confirmation that it can be provided; and;
- i. there is sufficient solid waste disposal capacity and written confirmation that it can be provided.
- 3. In addition to the above policies, in the Rural Area the following additional criteria apply:
 - a. where no new lots have been created from a parcel since July 21, 1992, a maximum of 2 new lots shall be permitted provided that the proposed lots(s) meet the following:
 - should have at least 1.0 hectare in area unless it is demonstrated by a hydro-geological study, completed to the satisfaction of the approval authority, that a smaller lot size is sustainable and will not adversely impact the water quality or quantity on adjacent lands;
 - ii. should have at least 100 m frontage;
 - iii. will not extend an existing "strip" of residential development by more than one lot
- 4. Notwithstanding sections 12.4.2, Callander Bay is currently at capacity for the creation of new lots. Any new lot creation will be subject to the provisions of section 4.3 of this Plan and the approval of the Ministry of the Environment. Applicants will be required to demonstrate that the septic system will be set back 300 metres from the shore of Lake Nipissing including Callander Bay and the Wasi River or that phosphorous will not reach the lake.

Other waterfront lots shall only be permitted where it is demonstrated to the satisfaction of Council or its delegate that the abutting waterbody, including rivers and streams, can sustain the impact associated with the additional lot(s).

In addition to the Shoreline Area policies of this Plan when considering applications for lot creation Council shall require that:

- a. there is sufficient frontage on each lot to ensure that there is an appropriate waterfront amenity area outside of sensitive fish habitat, steep slopes, or other environmentally sensitive areas;
- b. the physical characteristics of the land enable the development in accordance with the policies of this Plan and the regulations of the Zoning By-law without alteration to the natural landscape through filling or blasting;

- c. backlot development, is a form of development operating as an additional tier of lots adjacent to shoreline lots. A second tier of Backlot development that is separated from the waterbody by a road, may be permitted by this Plan subject to the land division policies of this Plan and subject to the following:
 - i. the lot to be created has a significantly larger lot area and lot frontage than the lots in the first tier;
 - ii. the lot is located within close proximity to a public access point to the lake;
 - iii. and each lot fronts on a year-round maintained public road;
- d. A phosphorous reducing sewage system in accordance with the policies of this Plan can be accommodated on site, with all components of the system being located a minimum of 30 metres from the high water or defined flood elevation;
- e. The water setback shall be a minimum of 20 metres for all principle buildings. The Zoning By-law will establish specific standards regarding accessory buildings and structures; and,
- f. The lot shall retain all significant indigenous soil, vegetation and tree cover as part of its development.

12.5.2 Technical Consent

Despite the above, consent may be granted in addition to the consent policies outlined above for a technical severance as follows:

- 1. To correct lot boundaries:
- To convey additional land to an adjacent lot provided the conveyance does not lead to the creation of an undersized lot for the purpose for which it is being or will be used;
- 3. To correct title to the land;
- 4. Where the effect of the consent does not create an additional lot;
- 5. To permit an easement; or
- 6. To permit a consent for municipal or other public purposes.

12.5.3 Draft Plan of Subdivision

Where the extension of public infrastructure such as roads, water or sewer mains is required, land shall be divided through a Plan of Subdivision.

- 1. When assessing a Plan of Subdivision application, Callander shall be satisfied that:
 - a. the draft plan of subdivision is in the public interest;
 - the draft plan of subdivision has regard to matters of provincial interest Planning Act, is consistent with the Provincial Policy Statement and conforms/does not conflict with the Growth Plan for Northern Ontario;

- c. the proposed development is not premature and is located within the urban settlement area;
- d. the land is divided in an efficient manner, and that landlocked parcels are not created;
- e. the proposed subdivision is integrated with the surrounding area;
- f. the proposed infrastructure is designed to meet or exceed Callander's standards;
- g. the subdivision shall not have a negative impact on the drainage patterns of the area;
- h. the subdivision will not impact the groundwater quality and quantity of the area;
- the proposed development will not have a negative impact upon the features and functions of any significant natural features or any constraints or hazards; and.
- the proposed lots are of a size appropriate for their intended use and conform with the policies of the Official plan and the Zoning Bylaw.
- 2. Prior to approval of an application for plan of subdivision, Callander will confirm the availability of adequate servicing infrastructure and allocation, waste management, roads/access, and other amenities in accordance with the policies of this Plan;
- Callander shall use subdivision agreements to ensure that appropriate conditions and requirements are satisfied as part of the development. Callander may adopt standards for the development, design, servicing, roads, financing, and other conditions under the subdivision agreement; and.
- 4. All conditions of draft plan approvals must be met within three years after which the draft approval lapses. Callander will not extend or recommend the extension of a draft plan approval, beyond the statutory limitation of three years, unless the subdivider has demonstrated to the satisfaction of Callander that they are making a reasonable effort to proceed in meeting the conditions of the draft approval. At the time of extension, Callander will review draft plan conditions and may make appropriate modifications.

12.5.4 Draft Plan of Condominium

Condominium developments shall proceed by way of a Draft Plan of Condominium, pursuant to the provisions of the *Condominium Act*.

- 1. When assessing a plan of condominium, conditions listed in Section 12.5.3 of this plan shell be met.
- 2. Callander shall review and approve the overall design of common elements, such as roadways and underground services, associated with the condominium development.
- 3. In the case of vacant land condominiums, where plans can be registered and lots sold prior to the installation of the common elements, Callander will require a letter of credit, equal to the costs associated with installing all

- common elements of the phase to be registered, as determined by a qualified professional to the satisfaction of Callander.
- 4. Callander shall use condominium agreements to ensure that appropriate conditions and requirements are satisfied as part of the development. Callander may adopt standards for the development, design, servicing, roads, financing, and other conditions under the condominium agreement.
- 5. Where existing condominiums have been approved, but not yet registered, Callander may enter into a condominium agreement which may include a letter of credit and any other matters Callander deems relevant.
- 6. All conditions of draft plan approvals must be met within three years after which the draft approval lapses. Callander will not extend or recommend the extension of a draft plan approval, beyond the statutory limitation of three years, unless the subdivider has demonstrated to the satisfaction of Callander that they are making a reasonable effort to proceed in meeting the conditions of the draft approval. At the time of extension, Callander will review draft plan conditions and may make appropriate modifications.

12.5.5 Part Lot Control

Council may pass by-laws to exempt all of parts of registered Plans of Subdivisions from Part Lot Control.

- 1. Part Lot Control shall not be used to circumvent the Subdivision or Consent processes;
- An exemption from Part Lot Control may be appropriate for situations
 where a thorough review process has been completed, or where buildings
 exist, and part lot control is utilized to sever lots along the common wall
 between units.

12.6 Urban Design Guidelines

Urban design, the multi-disciplinary and collaborative process that gives shape to the form, character and relationships between the various physical elements that make up Callander matters. How we design our public realm (e.g. streets and parks), private development sites, neighbourhoods, and communities is essential to improve the overall quality of the built environment, attract economic development opportunities and the skilled labour required to achieve strategic planning goals, maintain accessibility, improve safety and security, build sustainable environments and resilience to climate change. Callander through this Official Plan, other *Planning Act* tools and other public projects has an important role in shaping design. The intent of this Plan is to provide broad urban design direction to improve the quality and character of future public and private projects. These broad directions will be further articulated through a comprehensive set of Urban Design Guidelines.

12.6.1 Objectives

1. Encourage well designed and high quality communities, neighborhoods and public realm.

- 2. Encourage well designed and high quality development and intensification.
- 3. Promote an environment that is accessible, safe, sustainable and climate change resilient.

12.6.2 General

- 1. Callander will exemplify high quality urban design in infrastructure and other public projects through the implementation of the policies of this Plan and the Urban Design Guidelines.
- 2. Callander will require high quality urban design in the review of all *Planning Act* applications through the implementation of the policies of this Plan and the Urban Design Guidelines.
- 3. The policies of this section will be used to evaluate matters such as:
 - a. patterns of movement and the physical and social connections that exist between people and places;
 - b. the interrelationship between built and unbuilt spaces that comprise the public realm and private developments;
 - c. the protection and integration of the natural environment and cultural heritage resources; and,
 - d. accessibility, safety, sustainability and climate resilience.

12.6.3 Community and Neighborhood Design

Good urban design that respects existing built form and character can enhance the appeal of these neighbourhoods, including the integration of natural features. The following policies are established in order to promote a higher standard of community design.

- 1. Callander will encourage community and neighbourhood design that:
 - a. creates a distinctive community character and strong sense of place;
 - b. integrates a mix of land uses such as living areas, employment areas, institutional uses and parks and open spaces;
 - c. fosters active transportation;
 - d. incorporates natural and cultural heritage features and areas;
 - e. provides an interconnected network of parks and open spaces; and,
 - f. creates accessible, safe, sustainable and climate change resilient places.
- 2. Buildings, structures and other design elements that complement the surrounding built form and character are encouraged.
- 3. Streets are significant public realm elements that provide connectivity, serve pedestrians, cyclists, and vehicles, provide space for stormwater management and other municipal services and private utilities, trees and other amenities. Streets will be designed to perform these diverse roles balancing the needs of various users within the right of way.
- 4. Area streetscapes are to be improved over time to provide safe, attractive, interesting and comfortable spaces through appropriate upgrades, such as landscaping, lighting, sidewalks, paving, street furniture and public art.

- These treatments should complement adjacent built form and open spaces, adding to a neighbourhood's character.
- 5. The street grid is a major organizing element in many Communities that is to be maintained and improved. To improve connectivity and mobility, where these streets meet major topographic features or other barriers, pedestrian and cyclist infrastructure should be provided.
- 6. Wherever possible, natural features and functions should be integrated into the urban landscape in order to preserve and promote Callander's natural beauty and ecology.
- 7. Callander will promote the design, conservation, enhancement and creation of significant public open spaces that contribute to Callander's image. These open spaces will complement and support the uses, scale, design features and activities generated by surrounding uses and buildings.
- 8. To the extent possible, residential neighborhoods will be connected through the use of open space corridors, trails, sidewalks and streets so that neighbourhoods and schools are linked and interaction is facilitated.
- 9. New parks and open spaces will be located and designed to connect and extend, wherever possible, to existing parks and open spaces, provide a comfortable setting for community events as well as individual use, provide appropriate space and layout to meet recreational and other needs, and emphasize and improve unique aspects of the community's heritage.
- 10. The visual appeal of the urban environment will be enhanced by improving area signage. This may occur through the adoption of new sign regulations.
- 11. Landscape buffers between non-residential development and adjacent residential areas will be provided.

12.6.4 Waterfront Design

- 1. Waterfront design policies address the complex relationships between all of the elements of built form, the natural environment and the lake environment, and focuses on:
 - a. The connections between people and these places;
 - b. the relationship between buildings and the lake, natural areas and vegetative buffers, and other uses;
 - c. the lake as public domain; and,
 - d. the processes for ensuring successful lakeshore communities.
- 2. It is anticipated that Callander's waterfront may see significant growth and change during the life of this Plan. In order to ensure that the waterfront areas evolve in a manner that enhances the quality of waterfront life, it is the desire of Council to create and encourage a high quality of built form that is sensitive to the Callander's lake heritage and relates to the principles listed above. On this basis, the following are objectives of this Plan relating to waterfront design:
 - a. to improve the aesthetic quality of Callander's waterfront built form, and promote development which is based on good design

- principles and standards that reflect the goals, objectives and policies of this Plan;
- to enhance the unique character of Callander's waterfront areas by encouraging high quality design that is complementary and compatible with existing development, Callander's natural heritage, and which fosters a strong sense of place;
- c. to exercise appropriate municipal development control in order to achieve a consistently high quality of site, building and landscape design;
- d. to be sensitive to the impact of light and sound on the lakeshore environment: and.
- e. protect significant natural heritage values and ecological values.

12.6.5 Site and Building Design

The design of sites and buildings influence the quality, activity, comfort and safety of public realm elements such streets, parks and open spaces.

- 1. Development and intensification will be located an organized to fit with its existing or planned context. It will frame and support adjacent streets, parks and open spaces to improve activity, comfort and safety by:
 - a. generally locating buildings parallel to the street or along the edge of a park or open space with a consistent front yard setback. On a corner site, development and intensification should be located along both street frontages and give prominence to the corner. On a site that terminates a street corridor, the development should acknowledge the prominence of that site;
 - b. massing buildings to define the edges of streets, parks and open spaces in good proportion;
 - c. creating appropriate transitions in scale to neighbouring existing or planned buildings;
 - d. locating main building entrances so that they are clearly visible and easily accessible from the public sidewalk;
 - e. providing ground floor uses that have views into surrounding streets, parks and open spaces; and,
 - f. minimizing shadowing and uncomfortable wind conditions on surrounding streets, parks and open spaces to preserve their utility.
- 2. Development and intensification will locate and organize vehicle parking, vehicular access, service areas and utilities to minimize their impact on the property and on surrounding properties and the public realm by:
 - a. minimizing the number of curb cuts and driveways that cross the public sidewalk;
 - b. limiting surface parking between the front face of the building and the public street and sidewalk;
 - locating servicing and utilities towards the sides or rear of the building and screening the servicing from views from adjacent streets;

- d. integrating servicing and utility functions within the building, where possible; and,
- e. providing adequate landscaping and buffering between adjacent properties.
- 3. Development and intensification will provide amenity for adjacent streets, parks and open spaces by making these areas attractive, interesting, safe comfortable and functional by:
 - a. improving adjacent boulevards and sidewalks through sustainable design elements including without limitation trees, shrubs, plantings or other ground cover, permeable paving materials, street furniture and bicycle parking facilities.
 - b. coordinating landscape improvements in setbacks to create attractive transitions from the private to public realm;
 - c. providing, where appropriate, weather protection such as canopies and awnings;
 - d. providing landscaped open space within the development site;
 - e. landscaping the edges of surface parking lots along streets, parks and open spaces to define edge condition and provide screening;
 - f. providing safe pedestrian routes and landscaped areas within surface parking lots; and,
 - g. providing bicycle parking facilities and, where appropriate, within the development site.

12.6.6 Safety and Accessibility

The design of all buildings will have regard for public safety in terms of road and driveway entrances, walkways, vehicle parking and public space. Design treatments that reduce the potential for crime are encouraged by this Plan. In order to improve safety for pedestrians and cyclists, appropriate designs and techniques will be considered by Callander.

- 1. Traffic speeds will be reduced by appropriate road design and other traffic calming measures.
- 2. Pedestrians will be provided with separation from traffic and an enhanced sense of safety through such measures as:
 - a. providing medians or islands for pedestrians to use when crossing wider streets; and,
 - b. allowing greater use of on-street parking during appropriate times of the day and year to buffer pedestrians from moving vehicles.
- 3. Development and intensification will provide visible, well-lit and safe spaces.
- 4. Barrier-free access will be provided in all public and publicly accessible buildings and facilities and along pedestrian routes. Barrier-free features such as ramps, curb cuts and railings will be integrated with the building design.

12.6.7 Built Heritage and Natural Environmental Feature Integration

The integration of development and intensification with existing built form and natural features is required to ensure the cohesiveness of neighbourhoods and the integrity of streetscapes. Such integration creates an aesthetically pleasing urban environment and will enhance Callander's overall image. This is particularly important in the Downtown.

- 1. All community design will be properly integrated with Callander's Natural Environment features and existing built form. Natural features will be retained and integrated into proposed developments. Mature trees will be protected in order to provide shade canopy and to maintain their aesthetic and heritage value. The use of plant species native to the area will be encouraged when creating new landscape features.
- 2. Building designs will effectively utilize their site's distinctive potential, such as its geologic, biologic and hydrologic character.
- 3. A diversity of architectural styles and building materials is encouraged by this Plan.
- 4. New development should achieve a complementary design relationship to adjacent heritage resources.
- 5. In Callander's urban areas, urban landform features such as rock outcrops and hilltops provide visual assets that contribute to defining the image of Callander. New developments that are proposed on or near an urban landform feature will ensure, to the satisfaction of Callander, that there will be no significant change to the visual asset provided by the landform feature. Callander may require such developments to include measures that must be taken to mitigate any impacts on these visual assets.
- 6. New developments should aim at reducing light pollution, preserving the night skies, and conserving energy through appropriate site design and use of external lighting on development sites.

12.6.8 Design Features, Views and Corridors

The preservation and enhancement of Callander's design features, views and waterfront has a direct impact on the day-to-day experience of residents and the impressions made upon visitors. It is important to protect those elements that enhance the quality of the settlement area including scenic vistas and natural features, all of which collectively contribute to Callander's overall quality of place.

- 1. New land uses or design features that would detract from the enhancement of major focal point areas within Callander, such as Centennial Park and the downtown are discouraged.
- 2. Those aspects of the Downtown that contribute to the image, character and quality of life in Callander will be identified and preserved. Viewpoints to landmark features should be preserved as a means of guiding movement through the core and enhancing the visual appeal of the Downtown. New landmark features should be developed and integrated into the Downtown landscape, including the completion of the Library.

- 3. Landscaping will be used to frame desired views or focal points, direct pedestrian movement, and satisfy functional requirements, such as providing shade and buffering. All new development proposals will be evaluated for their opportunity to create, maximize or enhance existing views through landscaping.
- 4. This Plan encourages the design and layout of streets, pedestrian walkways and bicycle routes such that they provide vantage points for significant views and vistas along their lengths, including trails and bike paths.
- 5. View corridors to Lake Nipissing should be preserved.

12.6.9 Winter Liveability

Callander will encourage urban design solutions that enhance winter liveability by:

- 1. Fostering building design and orientation to take advantage of climatic conditions and utilizing passive solar heating and cooling techniques;
- 2. Encouraging the development of arcades or galleries linking parallel streets at mid-block location within the Downtown;
- 3. Investigating the feasibility of covered sidewalks at key locations;
- 4. Increasing the number of bus shelters at key locations;
- 5. Encouraging landscaping treatments which enhance winter microclimatic conditions and minimize wind chill level; and,
- 6. Encouraging the planting of evergreen tree species to increase the amount of winter greenery within Callander.

12.6.10 Energy Efficiency and Climate Change Resiliency

- 1. Callander will encourage urban design solutions that minimize nonrenewable resource consumption, maximize the use of renewable energy and takes into account the impact of climate change by:
 - encouraging compact, mixed use and infill developments that concentrate complementary land uses and support active transportation;
 - b. laying out new developments and siting new buildings to maximize the area's or site's passive solar energy potential;
 - c. retaining and utilizing existing trees and vegetation as natural shade canopies that reduce energy use;
 - d. requiring landscape solutions that maximize the use of native and climate resilient species, minimizes impervious surfaces and manages stormwater as close to the source as possible; and,
 - e. utilizing techniques and materials that increase energy efficiency.

12.6.11 Programs

 Callander will develop comprehensive Urban Design Guidelines that build on the policies of this Plan in order to establish appropriate design criteria for communities, neighbourhoods, public realm elements and all forms of

- public and private development. Such guidelines will consider alternative design standards, recent developments in eco-sensitive design and safety, including low impact development, amongst other matters.
- 2. Callander will initiate a beautification program including streetscape improvements to enhance the aesthetic quality of Callander's major roads, incorporating such elements as street trees, boulevards, sidewalk improvements, bike lanes, bike paths, parking bays, street lights and seating. Program options may include other streetscape redevelopments as recommended by Community Improvement Plans.
- 3. When approving infrastructure projects, Callander will consider allocating a proportion of project expenditures towards urban design improvements, such as streetscape aesthetics, public art, and other components of neighbourhood design.
- 4. In order to strengthen the visual appeal of Callander, design improvements to major entry corridors are required.

12.7 Tools for Obtaining Benefits from Development

12.7.1 Parkland Dedication

Council is entitled to a dedication of land for park purposes as a condition on any division of land in accordance with the *Planning Act*.

- 1. Callander shall develop a Parkland Dedication By-law for the purposes of collecting parkland or cash in lieu of parkland for redevelopment projects as specified in the By-law;
- 2. Callander, as a condition of development, redevelopment, condominium or subdivision approval or consent shall require the conveyance of parkland, or cash in lieu thereof, at the rate of:
 - a. for institutional and residential purposes, 5% of the land being developed or redeveloped, or 1 hectare per 300 dwelling units, whichever if the greater of the two; and,
 - b. for commercial and industrial purposes, 2% of the land being developed or redeveloped;
- 3. Where possible, parkland shall be taken on lands adjacent to a waterbody.
- 4. Environmentally sensitive areas which are not intended for public access should not be included in the total area of the plan of subdivision for the purposes of calculating the required 5 percent parkland dedication.
- 5. Where parkland is dedicated, the lands shall be acceptable to Callander, suitable for recreational purposes and free of encumbrances. A Record of Site Condition under the *Environmental Protection Act* may also be required prior to dedication;
- 6. The decision of whether to accept a parkland dedication or the alternative cash-in-lieu shall be based on the need to acquire as much parkland as required in the area to meet a variety of needs. These funds shall then be placed in a park reserve fund to be

applied toward the purchase of other parkland or to improve and maintain existing parks. Cash-in-lieu of land may be requested by Council in the following situations:

- a. Where there is a public park in the area which is adequate for existing and future population;
- b. Where the required land dedication fails to provide an area of suitable shape, size or location for development as public; parkland;
- c. Where the required dedication of land would render the remainder of the site unsuitable or impractical for development; and/or
- d. Where Callander is undertaking broader land acquisition strategies for larger parks and it is preferable to have consolidated parkland of a substantial size servicing a wide area.
- Where cash in lieu of parkland is provided, these monies may be utilized in the immediate vicinity of the development or in other areas or to fund municipality-wide recreational projects and other public amenities;
- 8. If parkland has been or is required to be conveyed to Callander or a payment in lieu has been received or is owing, no additional conveyance or payment may be collected for subsequent development or redevelopment unless:
 - a. there is a change in the proposed development or redevelopment which would increase the density of development; or
 - land originally proposed for development or redevelopment for commercial or industrial purposes is now proposed for development or redevelopment for other purposes that have a higher demand for park and open spaces.

12.7.2 Parkland Disposition

Disposing of Municipally-owned lands identified as named municipal parks is generally discouraged. Additionally, there are many existing Municipally-owned parcels that may be zoned for parks and recreation but are not necessarily identified as named municipal parks.

- 1. The following considerations shall apply in consideration of disposition of these lands:
 - a. opportunities to repurpose park space to increase usage should be proactively and thoroughly investigated before it is deemed surplus for disposition;
 - the surrounding area shall be assessed to ensure that future development does not increase the demand for park space. This should include an assessment of the potential for a demographic shift, especially where the predominant land use in the area is residential;

- assessment of whether the existing accessible parks are capable of supporting park space needs of the surrounding neighbourhood shall be undertaken;
- d. if a safety risk is posed by these lands, means to mitigate these concerns shall be thoroughly explored;
- e. if the park significantly impacts the development feasibility of the surrounding area, relocation of the park as a part of a future development may be considered;
- 2. Disposing of parks that contain natural heritage features such as fish habitat or wetlands, or development constraints such as flood prone areas or significant slopes, is discouraged; and,
- 3. Prior to the sale of Municipally-owned park space, Callander shall provide public notice and host a neighbourhood meeting to obtain feedback from neighbours, prior to Council making a decision on selling the park.

12.7.3 Community Benefits Charges and Development Charges

Council may enact a Community Benefits Charge By-law that imposes Community Benefits Charges, or a Development Charge By-law that imposes Development Charges, on developments and redevelopments to pay for the capital costs of facilities, services and matters required as a result of development or redevelopment.

12.7.4 Property Standards

The enforcement of minimum standards for the maintenance and occupancy of individual properties is important to the health, safety and welfare of Callander residents. It also assists in preserving the character of residential areas.

- 1. Callander shall retain and revise its Property Standards By-law, as needed, which prescribes standards for the maintenance and occupancy of properties within Callander
- 2. Callander may require that properties which do not conform to the Property Standards By-law be repaired and maintained to standard or shall prohibit occupancy of such property or order the site to be cleared of all structures and debris and left in a graded and levelled condition;
- 3. Council shall ensure the application of the Property Standards By-law is not detrimental to the conservation of heritage resources; and,
- 4. Council may amend the Property Standards Bylaw to prescribe minimum standards for the maintenance of heritage attributes for designated properties under the *Ontario Heritage Act*.

12.8 Planning Act Applications

12.8.1 Pre-Consultation

Prior to the submission of any development application for which Callander is the approval authority, applicants shall pre-consult with staff or a Planning Consultant

retained by Callander in accordance with the provisions of this Plan and Callander's Pre-consultation By-law. The pre-consultation process is intended to address the requirements for a completed application and may require more than one pre-consultation meeting and involve other agencies and municipal departments. Callander is required to adopt a Pre-Consultation By-law.

12.8.2 Complete Application

When the pre-application consultation process for a proposed development approval application identifies the need for one or more supporting studies, the application shall not be considered complete for processing purposes until the required supporting studies, information, and materials are submitted to the satisfaction of Callander.

Notification of a complete application shall be given to the applicant and all other parties in accordance with the *Planning Act*.

Should it be determined that through the review process, that the submission is incomplete, inadequate or further issues need to be addressed, additional information may be required. The authority to deem an application complete may be delegated to the Chief Administrative Officer by by-law. A checklist may be utilized to assist in ensuring the appropriate reports and studies are submitted to deem an application complete.

12.8.3 Public Notice and Public Input

Callander will strive to provide the community with adequate notice of development applications and statutory public meetings as required by the *Planning Act*. Callander shall meet the public notice requirements outlined by the *Planning Act* in terms of specified timeframes and required information.

12.8.4 Ongoing Civic Engagement

Callander will strive to provide ongoing, meaningful and diverse opportunities and venues for the public to engage with and provide input on a variety of municipal matters, in addition to the minimum statutory requirements prescribed in the *Planning Act* or other applicable legislation.

12.8.5 Indigenous Consultation

Callander recognizes the importance of working with First Nation and Indigenous community neighbours and learning from each other and will continue to work on these relations.

As appropriate, the Callander shall consult with First Nation and Indigenous communities on *Planning Act* applications, and as directed by the *Planning Act* and all relevant regulations.

12.8.6 Supporting Studies

Callander may require supporting studies as part of the planning approval process or as part of a more detailed planning study in order to satisfy certain goals, objectives and policies of this Plan. These studies could include, but are not limited to the following:

- Archaeological or Heritage Assessment
- Concept Plan showing planned land use
- Environmental Impact Study
- Erosion and Sediment Control Plan
- Flood Plan Assessment
- Geotechnical Assessment
- Groundwater/source water/surface water impact assessment and/or mitigation plan
- Hydrogeological and Terrain Analysis Report
- Lakeshore Capacity Assessment
- Market Study
- Natural Heritage Evaluation
- Noise/Dust/Vibration/Odour Study
- Record of Site Condition
- Servicing Capacity/Feasibility/Options Study
- Slope Stability Study
- Stormwater Management Report/Drainage Plan
- Transportation/Traffic Impact Assessment
- Any other study identified in the Plan or by Council Public consultation strategy

12.9 Monitoring and Amendments

Development within Callander will be monitored on a regular basis to ensure that the Principles, Strategic Direction, Objectives, and policies of this Plan are being achieved.

12.9.1.1 Official Plan Reviews

- 1. Callander shall, at minimum, conduct a comprehensive review of the Official Plan 10 years after the date this Plan comes into effect, and every 5 years thereafter;
- 2. A comprehensive review will include revisions as necessary to ensure:
 - a. conformity with Provincial plans and the Provincial Policy Statement;
 - b. regard for matters of Provincial interest;
 - c. consideration of updated population and land needs projections, to ensure adequate supply of developable land;

- d. consideration of new data relevant to Callander's development;
- e. consistency with other Municipal master plans and policy documents.
- 3. The Official Plan shall be reviewed and amended as required by Council or the Province, to meet the changing needs of the community and to respond to new issues and information.

12.9.1.2 Amendments

- 1. Official Plan Amendments may be initiated by Council or the public in accordance with Section 12.2 of this Plan;
- 2. In the case of technical amendments to the Official Plan or Zoning By-law notification to and consultation with the public will not be required. However, the proposed amendment will be published in the newspapers. This approach will be restricted to the following:
 - a. altering punctuation or language for consistency;
 - b. correcting grammatical, dimensional and boundary, mathematical or typographical errors;
 - c. inserting historical footnotes or similar annotations;
 - d. changing the number and arrangement of the text, tables, schedules and maps;
 - e. adding technical information to maps or schedules, deleting redundant provisions; and,
 - f. correcting anomalies.
- 3. All other amendments must follow public notice and public input procedures as established in the *Planning Act* and in Section 12.8.3 of this Official Plan.

12.9.1.3 Monitoring and Development

- 1. Callander shall continuously monitor key trends and indicators to ensure the Official Plan remains relevant and effective;
- 2. Indicators and data to be monitored include, but are not limited to:
 - a. population and demographic changes;
 - b. land supply and land demand;
 - c. indicators of progress regarding this Official Plan's overarching themes: healthy community, environmental sustainability, integrated mobility, sense of place, sustainable growth, economic resiliency, social equity and cultural vitality.

12.10 Plan Interpretation

The Callander Planning Department shall be responsible for interpreting all aspects of the Plan. In interpretating the Plan, the following policies shall apply:

- 1. The text, tables, schedules, and figures together form this Plan, and should be read together, and not considered in isolation;
- 2. For the purposes of interpretation, all Schedules should be viewed at the appropriate scale:
- 3. Consider boundary designations on the maps as general guidelines only, except where such areas or boundaries coincide with existing roads, railways, rivers, waterbodies, and other defined features;
- 4. Where the general intent of the Plan is maintained, minor land use boundary adjustments will not require an amendment to this Plan;
- 5. Official Plan is a holistic document. All relevant schedules and policies should be reviewed and applied in each situation. While some policies are cross referenced with each-other, this cross-referencing does not take away from the need to read the Official Plan as a whole. The ordering of the policies or length of an individual policy section does not imply any priority or importance.
